Government Statistical Service

A service of statistical information and advice is provided to Government by specialist staffs employed in the statistics division of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

Enquiries about statistical series in this volume should be made to the Department of origin. Current telephone numbers of these departmental sources as well as general information about the *Annual Abstract of Statistics* can be obtained from the Central Statistical Office, Great George Street, London SW1P 3AQ. Telephone: 01-270 6363 or 6364.

Enquiries about orders and subscriptions for the *Annual Abstract of Statistics* and other Central Statistical Office publications should be made to: Her Majesty's Stationery Office, PO Box-276, London SW8 5DT (Telephone: 01-211 8667 for subscriptions; 01-622 3316 for orders).

Standing order service

Placing a standing order with HMSO BOOKS enables a customer to receive future editions of this title automatically as published.

This saves the time, trouble and expense of placing individual orders and avoids the problem of knowing when to do so.

For details please write to HMSO BOOKS (PC 13A/1), Publications Centre, PO Box 276, London SW8 5DT and quoting reference X02.02.51

The standing order service also enables customers to receive automatically as published all material of their choice which additionally saves extensive catalogue research. The scope and selectivity of the service has been extended by new techniques, and there are more than 3,500 classifications to choose from. A special leaflet describing the service in detail may be obtained on request.

Introduction

The *Annual Abstract of Statistics* for the United Kingdom is prepared by the Central Statistical Office in collaboration with statistics divisions of other government departments. The name of the department or organisation providing the statistics is given under each table. Some of the statistics provided by government departments are actually collected by other organisations such as the national associations. The assistance provided by these organisations is gratefully acknowledged.

In addition, an Index of Sources is given on pages 322 to 328, which sets out the official publications or other sources from which the statistics are taken and to which reference can be made. The tables in this issue contain the latest statistics available, even though they may not yet have appeared in departmental publications.

Most of the tables in this *Abstract of Statistics* give annual figures, so far as they are available, for each of the years 1976 to 1986 and some include figures for the early months of 1987. Current data for many of the series appearing in the *Abstract* are contained in *Economic Trends*, the *Monthly Digest of Statistics* and in *Financial Statistics*, all prepared by the Central Statistical Office. Regional information, supplementary to the national figures in this *Abstract*, is published in *Regional Trends* also prepared by the Central Statistical Office. These publications are available from Her Majesty's Stationary Office at the addresses given on the back cover.

Definitions

Area covered. Except where otherwise stated all statistics relate to the United Kingdom of Great Britain and Northern Ireland.

Time series. So far as possible annual totals are given throughout, but quarterly or monthly figures are given where these are more suitable to the type of series. Except where it is stated to the contrary all statistics are for calendar years ended 31 December.

For some series, weekly data are collected and not figures for calendar years. In such cases the figures appearing for particular years are cumulative totals for 52 or 53 weeks and attention to this is drawn by the footnotes to the tables. Since the series have not been adjusted to make them equivalent to a calendar year, care must be taken in making comparisons between annual figures for periods of differing numbers of weeks.

Explanatory notes. Several sections of the *Abstract* are preceded by explanatory notes which should be read in conjunction with the tables. Definitions of many of the terms occurring in both the *Abstract* and the *Monthly Digest of Statistics* are given in the *Supplement of Definitions and Explanatory Notes to the Monthly Digest*, published annually. Detailed notes on items which appear in both the *Abstract* and *Financial Statistics* are given in an annual supplement to the latter entitled *Financial Statistics: Explanatory Handbook*. The original sources listed in the Index of Sources may also be consulted.

Consumption and stocks. Statistics of consumption and stocks should be used with care. The terms 'consumption', 'disposals' and 'stocks' are defined in details in the *Supplement to the Monthly Digest of Statistics*. The stocks figures given may often relate to only part of the total stocks in the country.

Standard Industrial Classification

The Standard Industrial Classification has been prepared as a means of securing uniformity and comparability in the statistics published by government departments in the United Kingdom. It is a system of classification according to industry; it does not relate to commodities or occupations for which other systems of classification have been devised. It was compiled to conform with the organisation and structure of industry within the United Kingdom.

A revised Classification, which replaces the 1968 Classification was published in 1979 and came into general use in 1983. One of the principal objectives of this revision is to eliminate such differences, as the structure of British industry allows, between the activity classification of the European Community, ('Nomenclature Generale des Activites Economiques dans les Communautés Europeennes (NACE)') and the 1968 Classification. The 1980 Classification is a different structure from its predecessor with 10 Divisions, 60 Classes, 22 Groups and 334 activity Headings. Full details are available from

Standard Industrial Classification revised 1980 (HMSO 1979, price £4.25 net) and *Indexes to the Standard Industrial Classification Revised 1980* (HMSO 1981, price £12.95 net). A detailed reconciliation between the 1980 and the 1968 Classifications is available only from the Central Statistical Office, Branch 7, Great George St, London SW1P 3AQ, price £2.00.

Revisions and changes in content

Revisions. The scope of the *Abstract* is revised from time to time to include new statistical information as it becomes available. Some of the figures, particularly for the latest year, are provisional and are revised in a subsequent issue of the *Abstract*.

New table. The following new tables have been added:

Table 3.36 — Fatal injuries at work

Table 6.8 — Unemployment figures by region

Table 7.5 — Outflow of UK Service personnel from each Service

Revisions. Other changes of contents in this compared with the previous issue, are:

Table 1.1 — Area of the United Kingdom

Table 3.29 — Hospital and family practitioner services

Table 3.30 — Hospital and primary care services

Table 3.32 — Manpower Summary

Table 5.16 — Universities: courses taken by full time students

Employment Chapter 6 — The majority of tables in this chapter have been renumbered

Table 6.11 — Industrial stoppages

Defence Chapter 7 — The majority of tables in this chapter have been renumbered

Deletions

The following tables have been deleted:

Table 6.8 — Unemployed in Great Britain

Table 6.9 — Unemployed in Northern Ireland

Table 6.12 and 6.13 — Temporary stopped workers — Great Britain and Northern Ireland.

Symbols and conventions used

Change of basis. Where consecutive figures have been compiled on different bases and are not strictly comparable, a footnote is added indicating the nature of the difference.

Units of measurement. A table showing the various units of measurement used in this *Abstract* and, where appropriate, their metric equivalents, is given on the inside back cover.

Rounding of figures. In table where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sums of the constituent items and the total as shown.

Symbols. The following symbols have been used throughout:

... = not available

— = nil or negligible (less than half the final digit shown)

nei = not elsewhere included

nes = not elsewhere specified

One Hundred Years Ago

SOME COMPARISONS: 1886 and 1986

Government has been publishing statistics for very many years but few publications make comparisons over very long periods. Following a practice established in 1986 this page shows some of the figures for 1886 compared with 1986. The figures for 1986 are taken from this edition of the *Annual Abstract* and for 1886 from the *Statistical Abstract for the United Kingdom 1884-1898*. We show here just a selection of figures which readers may find interesting.

These figures 100 years apart do not allow exact comparisons because definitions alter over time but they do give an idea of the changes in UK society as recorded in official statistics.

One of the most important definitional changes that needs to be borne in mind is that in 1886 the whole of Ireland was part of the United Kingdom and included in its statistics. This makes a considerable difference to the figure for 1886 because although the population of Ireland is very similar now to what it was then the population of the rest of the United Kingdom is considerably larger. The population of the whole of Ireland, North and South is about 5 million, about 3.5 million living in the Republic of Ireland and 1.5 million in Northern Ireland.

The value of the pound interests most people and needs to be taken into account in comparing financial figures. It is reckoned that in 1986 one would have needed just under £40 to buy what could be bought for £1 in 1886.

MONEY

	1886	1986
Value of the pound ¹	£1.00	£38.59
National debt ²	£742m	£171 367m
Government revenue ²	£90m	£106 132m
Government expenditure ²	£92m	£110 127m
Income tax ³ and property tax ²	£15m	£52 367m
Defence estimates ²	£30m	£17 943m ⁴
Imports	£350m	£86 067m ⁵
Exports (including re-exports)	£213m	£73 009m ⁵

1. Source: Department of Employment and Layton and Crowther, *The Study of Prices*.
2. Financial years, year ending 31 March.
3. The figure for 1886 relates to the year ended 31 March 1886 when the rate for tax was about 3½ pence in the pound. This figure includes tax on imputed rent of land and properties and income tax on profits of companies. The nearest equivalent for 1986 is the total UK taxes on income, which includes tax on the income of companies. Tax on imputed rent has been abolished.
4. This figure is the Defence outturn for 1985/86.
5. Provisional.

PEOPLE

		1886	1986

2 Population and Vital Statistics

This section begins with a summary of population figures for the United Kingdom and constituent countries from 1851 to 2025 and for Great Britain from 1801 (table 2.1). Table 2.2 analyses the elements of population change. Tables 2.3–2.4 give details of the national sex/age structure for years up to the present date. The marital condition of the population is given in tables 2.5 and 2.6. Table 2.7 gives projections of the population by sex/age up to the year 2025. The distribution of population at local and regional level is summarised in tables 2.8 and 2.9.

In the main, historical series relate to Census information while mid-year estimates are given for the recent past and the present.

Population (Tables 2.1–2.4).

Figures shown in these tables relate to the population enumerated at successive censuses, mid-year estimates and population projections.

Definition of resident population

The estimated population of an area includes all those usually resident in the area, whatever their nationality. Members of HM and non-UK armed forces are taken to be resident at their stationed address. Students are taken to be resident at their term-time address.

The current series of estimates are updated annually, starting with those derived from the 1981 Census of Population and then allowing for births, deaths and migration.

Projected Resident population of the United Kingdom and constituent countries (Table 2.7).

These projections are prepared by the Government Actuary, in consultation with the Registrars General, as a common framework for use in national planning in a number of different fields. A single principal projection for the next 40 years is made periodically on a set of assumptions which seems most appropriate on the basis of the statistical evidence available at the time. The projection is not, however, to be regarded as a 'forecast' in the normal sense of the word as population cannot be predicted over a 40-year period, and this is emphasised by the production every few years of supplementary projections made on assumptions differing from those of the principal projection.

The projections in table 2.7 have been made on the following assumptions. Where appropriate, differing assumptions have been made for the constituent countries of the United Kingdom and the averages of the assumed rates are quoted here.

Base population: As estimated for mid-1985 by the Registrars General.

Mortality: Death rates at the outset are based on recent experience. Over a period of 40 years the rates are assumed to decline by 15 per cent or more; the improvement assumed at the different ages ranges up to 27 per cent.

Births: There were 751 000 in 1985. The estimates assume 727 000 in 1986, 772 000 in 1987 and 790 000 in 1988. Fertility rates then rise gradually until 2008 when they reach a level, each woman on average producing 2 live-born children. After 1985, live-births fluctuate in line with the numbers of young women, reaching a peak of 838 000 in 1993, then falling to 711 000 in 2008 and rising again to 760 000 in 2025. A constant sex ratio of 106 boys to 100 girls has been assumed.

Migration: Allowance has been made for net outward migration of 17 000 persons a year for each year of the projection period after 1986–87.

Geographical distribution of the enumerated population: census figures (Table 2.8).

The urban and rural districts and the conurbations shown in the table are based on local government administrative areas as they were prior to reorganisation in England and Wales in 1974 and in Scotland in 1975. Preliminary population counts from the 1981 Census were prepared for these areas in England and Wales, but it was not possible to continue the series to 1981 in Scotland or in Northern Ireland.

A new study of urban land and population based on the 1981 Census of Population has been made in Great Britain and the results published in *1981 Census, Key Statistics for Urban Areas, Great Britain*. This gives the total population in Great Britain in urban areas in 1981 as 48 655 thousand and the population in remaining rural areas as 5 630 thousand, indicating that the division by administrative areas underestimated the urban population. However, it is not possible to give statistics of population in earlier years for the new urban areas, so the series based on administrative areas is given in table 2.8.

Migration into and out of the United Kingdom (Tables 2.10 and 2.11).

A migrant into the United Kingdom is defined as a person who has resided abroad for a year or more and on entering has declared the intention to reside here for a year or more; and *vice versa* for a migrant from the United Kingdom. Estimates are derived from the International Passenger Survey (IPS), a sample survey covering the principal air and sea routes between the United Kingdom and overseas but excluding routes to and from the Irish Republic.

In table 2.11, type of occupation is that followed prior to migration and 'Commonwealth citizens' in table 2.10 includes British citizens.

Acceptances for settlement in the United Kingdom (Table 2.12).

This table presents in geographic regions the statistics of individual nationalities, arranged alphabetically within each region. It should be noted that information is not separately available for all nationalities and countries and therefore the group sub-totals shown are simply the totals of the countries listed.

Divorce (Table 2.14, 2.15).

Table 2.14 gives figures relating to dissolutions and annulment with duration of marriage and age of wife. Scottish figures prior to 1979 relate only to marriages which took place in Scotland. Data in table 2.15 relate to petitions filed and grounds for divorce and separation.

Births (Table 2.16).

For Scotland and Northern Ireland the number of births throughout are those registered. For England and Wales the figures up to and including 1930–32 are for those registered and later figures shown are for those occurring in each year.

Deaths (Tables 2.19–2.22).

The figures relate to the number of deaths registered during the calendar year, the normal time lag between occurrence and registration being a matter of days only.

Life tables (Table 2.23).

The interim life tables are constructed from the estimated Home population in 1983–85 and the total deaths registered in those years.

1. Figures for Northern Ireland are estimated. The population at the census of 1926 was 1 257 thousand (608 thousand males and 649 thousand females).

2. Except for Northern Ireland, where a full census was taken, figures are based on the 10 per cent sample census.

3. These projections are 1985-based. More detail given in table 2.7.

4. The figures include 74 000 non-enumerated persons.

5. These figures have been revised using a new estimate of 44 500 non-enumerated persons in the 1981 census.

1. Census enumerated population up to 1951; mid-year estimates of Resident population from 1951 to 1986 and mid-1985 based projections of Resident population thereafter.
2. Including deaths of non-civilians and merchant seamen who died outside the country. These numbered 577 000 in 1911–1921 and 240 000 in 1931–1951 for England and Wales; 74 000 in 1911–1921 and 34 000 in 1931–1951 for Scotland; and 10 000 in 1911–1926 for Northern Ireland.
3. For England and Wales, changes in Armed Forces, in visitor balance and other adjustments.

Sources Office of Population Censuses and Surveys; General Register Office (Scotland); General Register Office (Northern Ireland); Government Actuary's Department

1. 1981 data cover the 'usually resident' population and are not strictly comparable with earlier data.

2. The figures for Northern Ireland have been revised using a new estimate of 44 500 non-enumerated persons in the 1981 Census.

Sources Office of Population Censuses and Surveys; General Register Office (Scotland); General Register Office (Northern Ireland)

2.4 Age distribution of the resident population: mid-year estimates¹

1. Populations of urban and rural districts and cities are for the administrative areas as constituted at the time of each census from 1911 to 1981. So some changes in population may be the result of changes in the constitutions of the areas; details can be found in the reports of the censuses. The cities shown do not include all urban areas with populations of 182 000 or more in 1981. Populations of Standard Regions and conurbations relate to approximately the same area throughout the period 1911 to 1981.

2. The statistics of area in square kilometres is for areas as constituted in 1971. The areas of urban and rural districts and of conurbations have not been measured since 1971, but there have been some changes in the areas of standard regions and cities.

3. Figures for urban and rural districts in England and Wales and for the conurbations are from the *Census 1981 Preliminary Report for Towns*.

Figures for Scotland, standard regions, and cities (administrative districts) are persons present on census night from *Census 1981, Key Statistics for Local Authorities, Great Britain*.

In Northern Ireland it is estimated that some 44 500 persons were not enumerated. These are included in the above figures.

4. Figures for Northern Ireland and the City of Belfast relate to the 1937 Census.

Sources: Office of Population Censuses and Surveys; General Register Office (Scotland); General Register Office (Northern Ireland).

2.9 Geographical distribution of resident population: mid-year estimates

1. Includes decrees of divorce and of nullity.

2. Children of the family as defined by the Matrimonial Causes Act 1973.

3. For divorces under pre-1976 legislation these figures relate only to persons who were married in Scotland, and obtained their decree of divorce from the Court of Session. Also with effect from 1 May 1984 the jurisdiction of the Sheriff Courts was extended to include divorce.

4. With effect from 1984 these statistics are being collected on the basis of divorces granted only and any difference in the number of divorces brought and granted relates to nullity of marriages.

5. Rates are calculated using the average of the estimated married male and female populations.

6. These Actions relate to all persons divorced or separated in Scotland, irrespective of the country of marriage.

7. Provisional.

1. Excluding petitions in which divorce is asked for in alternative to nullity.

2. The breakdown of petitions filed is based on actual figures for The Principal Registry of the Family Division together with grossed up figures, based on a two month sample, from the county courts. Estimated figures have been rounded to tens.

3. Including cases in which dissolution is asked for in the alternative.

4. With effect from 1984 these statistics are being collected on the basis of divorces granted only and any difference in the number of divorces brought and granted relates to nullity of marriage.

5. Prior to the Divorce (Scotland) Act 1976.

6. The grounds given show the allegations made—divorce is granted on the grounds of irretrievable breakdown of marriage under the Divorce (Scotland) Act 1976.

7. Divorce and separation.

3. Provisional.

1. Rates are based on a new series of population estimates which use a new definition and population base taking into account the 1981 Census results.
2. Total period fertility rate is the average number of children which would be born per woman if women experienced the age-specific fertility rates of the period in question throughout their child bearing life span. UK figures for years 1970-72 and earlier are estimates.

- Changes in OPCS coding of underlying cause of death (from 1 January 1984) have led to some differences in the pattern of causes of death for 1984 onwards as compared with previous years.
- On 1 January 1986, a new certificate for deaths within the first 28 days of life was introduced. It is not possible to assign one underlying cause of death from this certificate. The 'course' figures in this table for 1986 exclude all deaths at ages under 28 days.

3. Within certain main categories only selected causes of death are shown.

4. Occurred 1978, but not registered until 1980.

5. Industrial action meant that information supplied by coroners about accidental and violent deaths, except suicides, is not available.

Note Column l_x shows the number who would survive to exact age x , out of 100 000 or 10 000 born, who were subject throughout their lives to the death rates experienced in the three-year period indicated.

Column $^o e_x$ is 'the expectation of life', that is, the average future lifetime which would be lived by a person aged exactly x if likewise subject to the death rates experienced in the three-year period indicated. (See introductory note on page 5.)

3 Social Conditions

Government expenditure on social services and housing

The following tables of general government expenditure on the social services and housing in the United Kingdom comprise a summary table followed by separate tables for each of the social services and housing. The definition of government expenditure used in these tables follows that in Table 9.4 of *United Kingdom National Accounts 1987 Edition*, the CSO Blue Book, and covers both current and capital expenditure of the central government (including the National Insurance Fund) and local authorities. The housing table also includes the capital expenditure of public corporations concerned with housing. As in the Blue Book government expenditure is measured after deducting fees and charges for services. Expenditure on administration includes the cost of common services (accommodation, stationery and printing, superannuation, etc.) some of which is not directly borne by the departments administering each service. Transfers from one part of government to another have been eliminated to avoid double counting. The figures relate to years ended 31 March. Figures for the latest two years are the most recent estimates available and are subject to revision.

It should be noted that the figures no longer include imputed rents for the use of fixed assets owned and used by general government. In the Blue Book imputed rents have been replaced by capital consumption. Capital consumption, however, cannot be allocated to individual services and is therefore not included in these tables.

The following notes give brief descriptions of each of the main services shown in the tables.

Education

This covers expenditure by the Education Departments, local education authorities and the University Grants Committee on education in schools, training colleges, technical institutions and universities. It includes expenditure on school meals and milk.

The education statistics in Table 3.2 are provided by the Department of Education and Science. They are not normally able to provide a full set of estimates, from their sources, for the latest two financial years. The CSO has in the past made estimates for these years from a variety of sources but, following a review of the accuracy of these estimates, it has been decided that they do not give a reliable guide to the final outcome and have therefore been withdrawn.

National health service

This covers expenditure by central government on hospital and community health, family practitioner and other health services. The expenditure by local authorities on the provision of health centres, health visiting, home nursing, ambulance services, vaccination and immunisation, etc., was transferred to central government on 1 April 1974. Only the net costs of providing these services are included in total government expenditure, receipts from patients being shown separately.

Personal social services

This covers local authority expenditure on the aged, handicapped and homeless, child care, care of mothers and young children, mental health, domestic help, etc. Also included are central government grants to voluntary approved schools.

Welfare foods

This covers the cost of providing welfare foods at reduced prices to children and expectant mothers. Only the net costs of providing these services are included in the total government expenditure, payments by the recipients of the services being shown separately.

Social security

This comprises both benefits under the Social Security schemes and non-contributory benefits and allowances, administered by the Department of Health and Social Security. The analysis by type of supplementary benefit is not exact; the estimates are derived from average numbers in receipt of benefit and average amounts paid. Unified housing benefit (rent rebates and allowances) is also included

as social security expenditure and not as housing expenditure. This is now mainly administered by local authorities who receive grants from central government.

Housing

The table shows, in addition to government expenditure on housing, the capital expenditure of public corporations and the total expenditure of the public sector on housing. The government expenditure figures cover subsidies paid by the Housing Departments towards the provision of housing by local authorities, new town development corporations and housing associations; subsidies by local authorities to their housing revenue accounts; rent rebates for tenants of housing owned by local authorities and new towns; rent allowances for tenants of privately-owned housing; grants to persons for the reduction of mortgage interest payments; capital expenditure on the provision of houses for letting; capital grants to housing associations; grants by local authorities towards the cost of conversion and improvement of privately-owned houses; net lending by the central government and local authorities for private house purchase and improvement and loans for first time purchases. The public corporations' figures cover capital expenditure on the provision of houses for letting and lending by the Housing Corporation to housing associations.

Social Security

Tables 3.12 to 3.16, 3.20 to 3.28 give details of contributors and beneficiaries under the National Insurance and Industrial Injury Acts, supplementary benefits and war pensions.

There are three types of contributor:

- Class 1* Employed persons, that is, persons working for employers. Their contributions are paid partly by themselves and partly by their employers. They are covered for all benefits.
- Class 2* Self-employed persons, that is, persons working on their own account. They are covered for all benefits other than unemployment and industrial injuries.
- Class 3* Non-employed persons, that is, persons who do not work for gain. They are covered for benefits other than unemployment, sickness, industrial injuries and maternity allowances.
- Class 4* Payable, in addition to Class 2 by self-employed persons, and the amount payable is proportionate to profits or gains between a lower and upper limit in any one year.

An employer must pay a contribution for every employee whose earnings exceed a base level. Most employed persons pay the full employee's contribution, but retirement pensioners working for an employer do not and some married women and some widows who are working need not, unless they so wish, contribute except for industrial injuries benefit. Thus the total numbers in the analysis by benefit for which the contributions were payable are less than the total numbers in the analysis by class of contributor.

Sickness benefit (Tables 3.17 to 3.19)

The population at risk for sickness benefit is the working population apart from men over age 65 and women over age 60 who are retirement pensioners and all men over 70 and women over 65, members of the Armed Forces, mariners while at sea, most non-industrial civil servants and Post Office employees (who do not normally claim sickness benefit until an illness has lasted six months) and married women and certain widows who have chosen not to be insured for sickness benefit (about three-quarters of all married women in employment have chosen not to pay flat-rate contributions).

(continued on page 43)

Fatal injuries at work (Table 3.36)

Under the Notification of Accidents and Dangerous Occurrences Regulations, in force from 1 January 1981 to 30 March 1986, most fatal injuries at or resulting from work activities were reported to HSC enforcement authorities. From 1 April 1986 this requirement continues under the Reporting of Injuries Diseases and Dangerous Occurrences

Regulations, currently in force. Prior to 1981, fatal injuries were reported on a less comprehensive basis, and are not therefore comparable with the totals given in the table. Deaths of self employed people and members of the public are included in the table. Some of these were reported voluntarily prior to 1981.

1. From 1980/81 slum clearance statistics for England are collected on a financial year basis.

2. Excluding dwellings previously reported closed.

3. Action under the Housing Acts, Town and Country Planning Acts and other specific statutory powers and other action. Unfit houses comprise houses dealt with since 25 August 1969 as failing to meet the tolerable standard introduced by the Housing (Scotland) Act 1969 and houses dealt with under earlier statutory provisions as being unfit for human habitation.

4. Figures from 1979 are for below tolerable standard.

5. Provisional.

1. The tax year commences on 6 April and ends on 5 April of the year following. The years shown at the head of the column refer to the end of the tax year. Persons who paid any contributions at any time in the tax year are shown.

2. Not all figures agree because of rounding.

3. Persons who paid a mixture of Class 3 contributions and others are not included in 'Class 3' but are shown according to the type of the additional contribution.

4. Revised figure.

1. Persons under the age of 18 are entitled to the appropriate adult rate.

2. Mobility Allowance was introduced from 1 January 1976 at the £5.00 rate.

3. Death grant is not payable in respect of the death of a person who on 4 July 1948 was aged 65 or over (man) and 60 or over (women).

4. Retirement pensioners over 80 receive 25p addition.

5. An allowance for one adult dependent is payable, where appropriate, with unemployment benefit, sickness benefit, retirement pension, injury benefit, certain disablement pensions and, maternity allowance. Allowances for dependent children are payable with any of these benefits. The rates of increases of benefit for the children of widowed mothers are at higher rates than those for the children of other beneficiaries. Changes in these increases take effect from the same date as the main benefit.

6. Injury benefit ceased on 6 April 1983.

7. Child dependency addition was abolished from 24 November 1984.

8. Child benefit replaced family allowance from 5 April 1977.

9. Supplementary pension is paid to people over age 65 (men) or 60 (women).
Supplementary allowance is paid to people below those ages. Persons aged 80 years and over are entitled to a further 25p.

10. Scale rates for normal requirements other than rent.

11. Including couples as man and wife.

12. Including any single person who is directly responsible for rent.

Source Department of Health and Social Security

Footnotes to Table 3.14 on page 53

- For employees who are under pension age (65 men/60 women), but excluding those married women or widows who are liable for contributions at the reduced rate.
- For employees who are married women or widows and liable for contributions at the reduced rate.
- For all employees over pension age. Applicable also to employees who had made other arrangements to pay Class 1 contributions.

- Includes 2 per cent National Insurance surcharge under the National Insurance Surcharge Act 1976. The employers contribution was raised by a further 1.5 per cent from 2 October 1978 when the surcharge was increased to 3.5 per cent. From 2 August 1982 the surcharge was reduced to 2 per cent, from 6 April 1983 reduced to 1.5 per cent and from 1 August 1983 reduced to 1.0 per cent and reduced to nil from 6 October 1984.
- From 6 October 1985 LEL £35.50 a week, from 6 April 1986 LEL £38.00 a week.

1. Great Britain figures are an average of the four quarters for the year and for Northern Ireland an average of the two six monthly figures. Due to industrial action and figures being unavailable, the Northern Ireland figures for 1985 relate to May only.

2. Average of twelve monthly figures commencing on the first Monday in June up to 1982 and from first Monday in April thereafter. For Northern Ireland average of twelve monthly figures commencing from January. A relatively small number of claims do not result in the payment of benefit but are included here because they indicate notified incapacity for work.

3. Includes overseas cases.

4. Northern Ireland figures are at 31 March.

5. Grants paid in year.

6. Excluding widows' allowances paid during the first twenty-six weeks of widowhood the number of such allowances does not exceed 35 000 in a six month period.

7. Northern Ireland figures are at 30 November.

8. Includes overseas cases.

9. Injury benefit was abolished from 6 April 1983 with transitional payments until 3 October 1983.

10. From April 1977 child benefit replaced family allowance.

11. Northern Ireland figures are at 1 December.

12. Great Britain only.

13. February 1981 data for Great Britain only, due to industrial action.

14. Northern Ireland only. Great Britain data not available due to industrial action.

15. Estimated.

16. Northern Ireland only. Great Britain data not available.

Note: Figures are based on a five per cent sample. For Northern Ireland figures are based on a twenty per cent sample.

1. 1981 figures are for Northern Ireland only. Due to industrial action 1981 figures for Great Britain are not available.
2. Earnings related supplement was abolished from 2 January 1982, but continued in payment for certain transitional cases up to 30 June 1982, when it finally ceased.
3. Because of industrial action at local offices of the Employment Services Agency the figures for May 1984 are not available.
4. Prior to November 1978 figures for non-recipients of benefit include non-claimants; from November 1978 only claimants for benefit or credit are included.
5. Figures are for Great Britain only. Due to industrial action November 1985 figures for Northern Ireland are not available.

1. Because of industrial action in some unemployment benefit offices at the time of the supplementary benefit annual statistical inquiry, in December 1976, it was not possible to obtain the usual information on unemployed claimants. As a result 1976 figures for unemployed cases, total supplementary allowance and total supplementary benefit cases are estimated.
2. See footnote 2 to table 3.25.
3. Great Britain data is extracted from the Annual Statistical Enquiry undertaken in February 1986. Northern Ireland data is not yet available.
4. Includes claimants in receipt of severe disablement allowance.
5. Figures relate to one-parent families headed by a man also.

1. In year to 30 September, from 1984 is to 31 March.

2. Includes transfers out from 1976 onwards.

3. At out-patient and accident and emergency departments.

4. At 30 September.

5. Figures exclude officers holding honorary and locum appointments. Part-time includes maximum part-time and GP hospital appointments.

6. From 1979 onwards, ODAs (Operating Department Assistants) are included in Professional and technical staff; previously ODAs were included in Ancillary staff.

7. Estimated from financial year figures.

8. At 1 October.

9. For prescriptions dispensed in calendar year by all general practice pharmacists and appliance suppliers.

10. Assistants are excluded.

11. Supply of spectacles restricted from 1 April 1985.

1. Average during year.

2. At out-patient and casualty departments.

3. At 31 March.

4. At 1 July.

5. At 31 December.

6. Excluding sight tests given in hospitals and under the school health service.

7. Figures from 1977 include payments of VAT and superannuation.

8. Manpower figures refer to 31 December. From 1981, figures for medical and dental staff exclude some joint appointees, information for whom is not held on the computer payroll.

9. Figures relate to the cost of the hospital, community health, and personal social services, and have been estimated from financial year data.

10. Data not available due to industrial action.

11. The decrease in figures may be attributed to new legislation introduced on 1 July 1985 which allowed the issue of optical appliances by unregistered suppliers under the 'Voucher Scheme'.

1. Whole-time equivalent. Figures exclude locums and general medical practitioners participating in Hospital Staff Fund.

2. Figures include Senior Hospital Medical/Dental Officers (SHMO) without an allowance and other ungraded staff.

3. Whole-time equivalent. Figures exclude locums and occasional seasonal staff.

4. Excluding agency nursing and midwifery staff.

5. Figures exclude ambulance officers.

6. Includes Family Practitioner Service administrative and clerical staff and General Managers.

7. From 1 April 1984, Operating Department Assistants (ODAs) were transferred from Ancillary to Professional and Technical 'B' Staffs Council. Therefore figures for these staff groups prior to September 1984 are not comparable with those for September 1984 onwards (accounting for approximately 3000 WTE in September 1984).

Acute poliomyelitis ¹	—	2	—	—	—	—	1	—	—	—	—

1. Including acute poliomyelitis.

2. The figures show the corrected number of notifications, incorporating revisions of diagnosis, either by the notifying medical practitioner or by the medical superintendent of the infectious diseases hospital. Cases notified in Port Health Districts are excluded.

3. Formal notifications of new cases only. The figures from 1982 exclude chemoprophylaxis.

4. From 1982 categories overlap and therefore cases will be included in respiratory and other tuberculosis.

5. Figures include cases of tuberculosis not notified before death.

IN PREPARATION:

INPUT—OUTPUT
TABLES FOR THE
UNITED KINGDOM 1984

Input-output tables are an indispensable aid to economists interested in the interdependence of the various industrial sectors of the economy. They present a snapshot of the economy for one time period, illustrating the connections between primary inputs and final demand at an industry level.

The tables are the first to be compiled since the 1979 set, and will be for the calendar year 1984, consistent with the national accounts estimates for that year as given in the 1987 Blue Book.

Table 3.36 (contd.)

See Note on page 43.

1. Includes work related fatalities to employees and non-employees, ie. the self employed and members of the public.
2. Includes figures for the oil and gas industry collected under the Mineral Workings (Offshore Installations) Act 1971.
3. Included with 51C80. Class 25.
4. Mainly local authorities for which an industrial breakdown is not available.

5. Includes deaths of the crew on board vessels registered in the United Kingdom from casualties to vessels and accidents on board (excluding homicide and suicide) and the presumed deaths of crew members missing at sea for 1980–82 reported under the Merchant Shipping (Returns of Births and Deaths) Regulations. The fatalities reported for 1983–85 are reported under the Merchant Shipping (SORADO) Regulations (SI-1982/876). They are those which occurred on board or on access equipment to all vessels registered in the UK.
6. From 1983 this should read, over 24 metres in length.
7. Provisional.

(thousands)	1 028	1 210	15	36	1 058	1 288	715	852	1 235	1 410

1. Votes recorded in the same seats in the previous General Election.
2. The Social Democratic Party was launched on 26 March 1981. An SDP candidate contested a Parliamentary seat for the first time in the by-election held at Warrington on 16 July 1981. From that date, the Liberal and Social Democratic Parties contested 26 by-elections with only one of the parties putting up a candidate in each.

3. The proportions of votes recorded for 'other' is high because three of the 20 by-elections were in Northern Ireland. Two were in the same constituency, Fermanagh and South Tyrone, and as votes recorded at both by-elections have been included, votes recorded for the 1979 General Election have been included twice in the previous General Election column.
4. The proportion of votes recorded for 'other' is high because 15 of the 31 by-elections were in Northern Ireland.

Source Home Office

4 Law enforcement

There are differences in the legal and judicial systems of England and Wales, Scotland and Northern Ireland which make it impossible to provide tables covering the United Kingdom as a whole in this section. These differences concern the classification of offences, the meaning of certain terms used in the statistics and the effects of the several Criminal Justice Acts.

Court proceedings and police cautions

The statistical basis of the tables of court proceedings is broadly similar in England and Wales, Scotland and Northern Ireland; the tables show the number of persons found guilty, recording a person under the heading of the principal offence of which he is found guilty, excluding additional findings of guilt at the same proceedings. A person found guilty at a number of separate court proceedings is included more than once. In Scotland not all cases in which a charge is proved lead to a formal conviction or finding of guilt; these cases are those in summary procedure in which the accused receives an absolute discharge or a probation order.

The statistics on offenders cautioned covers only those who, on admission of guilt, were given a formal caution by, or on the instructions of, a senior police officer as an alternative to prosecution; written warnings by the police for motoring offences and persons paying fixed penalties for certain motoring offences are excluded. There are no statistics on cautioning available for Northern Ireland.

For England and Wales from 1979 a new offence classification and tabulation procedure was introduced to reflect the changes in the mode of trial introduced by Part III of the Criminal Law Act 1977 in July 1978. Figures for 1977 and 1978 are given on the new basis to enable comparisons to be made with 1979 to 1983. Indictable offences cover offences for which a defendant may be tried at the Crown Court; summary offences cover offences for which the defendant may only be tried at a Magistrates' Court. Since 29 March 1982 the courts have had the power to suspend between one quarter and three quarters of a sentence of imprisonment of six months for up to two years; from 31 January 1983 Section 30 of the Criminal Justice Act 1982 reduced the minimum period to three months and allowed a minimum of 28 days to be served. Part I of the Criminal Justice Act 1982, with effect from 24 May 1983, abolished borstal training and imprisonment for offenders aged under 21 and introduced youth custody.

Section 45 of the Criminal Justice (Scotland) Act 1980 was implemented on 15 November 1983; this introduced unified custodial sentencing for under 21 offenders and abolished borstal training.

In Northern Ireland non-indictable offences are dealt with at Magistrates' Courts where some indictable offences may also be tried. The majority of indictable offences are, however, tried at Crown Courts. The Crown Court system was introduced in Northern Ireland in April 1979; prior to this date the County Courts and Assizes system was equivalent to the Crown Court in England and Wales.

Criminal damage ³	93.0	297.4	306.2	320.5	359.5	386.7	417.8	443.3	497.8	539.0	583.6
Other offences ^{5, 6}	10.1	9.7	3.5	3.7	4.1	4.1	3.8	8.7	10.4	12.2	16.7

1. These offences were referred to in 1978 and earlier years as 'Indictable offences recorded by the police'.

2. Figures for 1980 onwards are not comparable with those for previous years because of changes to improve the consistency of recording of multiple, continuous and repeated offences.

3. Offences of criminal damage value £20 and under are not included before 1977; in 1986 there were 187 406 such offences.

4. Includes from the beginning of 1983 offences of 'Gross indecency with a child'.

5. Offences of abstracting electricity are included in 'Other offences' up to and including 1977 and in 'Theft and handling stolen goods' from 1978.

6. Includes from the beginning of 1983 offences of 'Trafficking in controlled drugs'.

1. The Prison Department introduced in 1983/84 a costing system designed to provide line managers in the Prison Service with better management and financial information. The present table classifies expenditure in the same way as the costing system but differently from in earlier years. It follows that the accounting records showing expenditure details from 1983/84 onwards are not comparable, except as regards capital expenditure, with those for previous years.

2. 'Costs' differ from actual money spent as they include notional charges, ie superannuation and depreciation.

Source Home Office

3. Total net operating costs for 1974/75 to 1982/83 have been calculated by adding maintenance, repairs, rentals, etc. costs, shown under capital expenditure in earlier volumes of the Annual Abstract, to the total net current expenditure for those years. This is consistent with the approach taken in the costing system.

4. Capital expenditure includes Property Services Agency expenditure on behalf of Prison Department.

5. This was the cost of setting up and maintaining camps during the Prison Officers' dispute from October 1980 to February 1981. These costs cannot be attributed to individual groups.

Civil prisoners	26	5	20	11	15	14	13	15	17	21	13

1. From 1983 onwards persons detained under Section 205(2) of the Criminal Procedure (Scotland) at 1975 are included as adults or young offenders according to the type of establishment in which they were held. For earlier years they are all included as young offenders.

2. Total receptions cannot be calculated by adding together receptions in each category because there is double counting. This arises because when a person is received on remand and then under sentence in relation to the same set of charges, he is counted in both categories.

1. Offences known to the police consist mainly of indictable offences and include some hybrid offences. From 1975 to 1981 hybrid offences were included under non-indictable offences; for 1982 onwards, they are included under indictable offences.

2. Borstal training ceased in October 1980.

3. Includes those awarded periods of detention in young offenders centres.

4. Includes those awarded periods of detention in the young offenders centre and those awarded suspended sentences.

5 Education

In general the education services of the United Kingdom are not subject to detailed central control. Standards are maintained by an Inspectorate with advisory functions having access to all institutions except the universities and related bodies. Within this framework detailed control is exercised by local education authorities or by various forms of independent governing bodies, in association with the teaching staff. In all sectors, such matters as engaging teachers and selection of textbooks and curricula are part of these detailed local responsibilities.

The four government departments dealing with education statistics are:

Department of Education and Science:

which deals with all sectors of education in England, and with the Government's responsibilities towards universities in Great Britain.

Welsh Office, Education Department:

which deals with schools and (from April 1978) higher and further education in Wales, excluding matters connected with universities and with the qualifications, probation, remuneration, superannuation and misconduct of teachers.

Scottish Education Department:

schools and further education in Scotland.

Department of Education, Northern Ireland:

schools, further education and universities in Northern Ireland.

The University Grants Committee advises the education departments in Great Britain and in Northern Ireland on the needs of the universities and is concerned with plans for their development.

Statistics for the separate systems obtaining in England, Wales, Scotland and Northern Ireland are collected and processed separately in accordance with the particular needs of the responsible Departments and, particularly where there are structural differences, the assembly of statistics covering the United Kingdom as a single unit presents considerable problems and in some fields is impossible at present.

Stages of education

There are three stages of education: primary (including nursery), secondary, and further (including higher) education. The first two stages are compulsory for all children between the ages of five and sixteen years and the transition from primary to secondary education is usually made between ten and a half and twelve years. The third stage of education is voluntary and includes all education provided after full-time schooling ends.

Primary education

Primary education includes three age ranges: nursery, under five years of age; infant, five to seven or eight years; and junior, seven or eight to eleven or twelve years. The great majority of public sector primary schools take both boys and girls in mixed classes. In Scotland the distinction between infant and primary schools is generally not made.

Middle schools

In England middle schools take children from first schools and generally lead on, in turn, to comprehensive upper schools. They cover varying age ranges between eight and fourteen. Depending on their individual age range they are deemed either primary or secondary by Order of the Secretary of State for Education and Science or (for age range nine to thirteen) by choice of the local education authority. Wales has only one middle school, Scotland has two.

Secondary education

Provision of secondary education in an area may include any combination of types of schools. The pattern is a reflection of historical circumstance and of the policy adopted by the local education authority. There is a growing trend to comprehensive schools, on a variety of patterns as to forms of organisation and the age range of the pupils attending. In their 'pure' form, comprehensive schools admit pupils without reference to ability and aptitude, and cater for all the children in a neighbourhood. In 1986 88 per cent of secondary schools in England were comprehensive. Scotland has some schools which are part comprehensive/part selective; these are comprehensive in intake but selective as regards level of courses offered (typically not beyond 'O' grade).

Special schools, both day and boarding, provide education for handicapped children who cannot be educated satisfactorily in an ordinary school. Hospital special schools provide education for children who are spending a period in hospital.

Further education

The term 'further education' may be used in a general sense to cover all education after the period of compulsory education. More commonly it excludes those staying on at secondary school, and those studying at universities, or at colleges of education (teacher training) in Scotland and Northern Ireland. Following the reorganisation of teacher training in England and Wales from 1976 the former colleges of education that did not merge with a university department of education, have been included with other further education establishments in England and Wales.

Higher education

The term 'higher education' includes all students in universities, and colleges of education in Scotland and Northern Ireland, together with students in further education colleges on courses leading to advanced level qualifications, i.e. qualifications above General Certificate of Education 'A' levels, Scottish Certificate of Education 'H' grade, and Ordinary National Diploma or Ordinary National Certificate. This will include all teacher training courses.

1. Schools (excluding independent) in Scotland and Northern Ireland with more than one department have been counted once for each department.

2. Schools are counted at January except for Scotland and Wales (1977–78 onwards) when the count is at September. Further education establishments are counted at 1 November—England and Wales, October—Scotland and Northern Ireland. University establishments at 31 December.

3. The secondary and preparatory departments of assisted and public sector grammar schools in Northern Ireland have been counted as separate schools.

4. Including for Scotland grant-aided nursery, primary and secondary schools/departments and independent schools.

5. Education authority and grant-aided special schools/departments for Scotland.

6. Polytechnics and maintained and assisted colleges in England and Wales, education authority colleges in Scotland, Stranmillis College of Education and education authority/education and library board colleges in Northern Ireland.

7. Direct grant colleges in England and Wales, central institutions, voluntary bodies and colleges of education in Scotland, voluntary colleges of education in Northern Ireland (St. Mary's College and St. Joseph's College).

8. Ulster Polytechnic became part of the University of Ulster from the start of the 1984/85 academic year.

9. St. Mary's and St. Joseph's Colleges (NI) merged at the start of the 1985/86 academic year to become St. Mary's College of Education.

10. Excludes youth clubs and centres; these were deleted from the 1985/86 survey.

1. In Wales from 1977 the school census date was advanced to September whereas that for the rest of the United Kingdom remains at January. From 1977 onwards in Scotland, figures are at the previous September (the same academic session).

2. Age at beginning of January for 1980.

3. Age at 31 August from 1980 onwards.

4. For non-maintained schools in England, pupils' ages have been estimated.

5. Provisional; these figures include 1984-85 data for Scotland.

6. Each part-time pupil (aged 2-4, but also small numbers aged 5 in Scotland attending nursery schools) has been counted as one.

7. The Registrars General estimates of resident population have sometimes been slightly below the number of children found to have attended school.

8. As a percentage of the 18 years age-group.

1. In Wales from 1977 the school census date was advanced to September whereas that for the rest of the United Kingdom remains at January.
2. England, Wales and Northern Ireland only.
3. Excluding part-time teachers in hospital schools, full-time equivalent in 1986 was 32.
4. In the 1986 column, data for Scotland relate to 1984/85.
5. In 1975 a change was made in the method of recording the major handicap of pupils attending educationally sub-normal (severe) special schools in England and Wales and for the first time a number of them (6 908) were returned within a category other than 'educationally sub-normal'.
6. England and Wales only.
7. Information on individual handicaps ceased to be collected in 1984.

1. Excluding data for pupils at schools and for the Open University for which subject detail in this format is not available.
2. Including 684.3 thousand students in all modes in England, Wales and Northern Ireland who are taking unspecified courses.
3. Including sandwich students.
4. Day and evening.
5. Including 1.1 thousand part-time students from abroad in Scotland and Northern Ireland.
6. Including students in England formerly allocated to 'unspecified' education courses.
7. A new improved subject classification for universities was introduced in 1985–86. Consequently university students cannot be directly compared with public sector students.

1. Teacher training results are shown in table 5.12. However these overlap with results shown here.

2. Excluding qualifications, from the private sector.

3. Excluding Open University degrees for which subject detail in this format is not available. These numbered 61 higher degrees, 1 407 honours degrees (737 men) and 6 678 ordinary degrees (3 446 men).

4. Including Postgraduate Certificates in Education (PGCE's).

5. Department of Education and Science (DES) estimates based on various sources.

6. Excluding students who successfully completed courses for which formal qualifications are not awarded.

7. Including Dip HE, Certificates of Education and PGCEs.

8. Data by sex are not available for HND/HNC; SCOTVEC diplomas and certificates; OND/ONC.

9. Scotland data are for 1984.

10. DES estimates based on final year of course data.

11. In addition, 38 000 students obtained nursing and paramedical qualifications at Department of Health and Social Security establishments.

12. Including Diploma in Management studies, which is equivalent to First Degree. These numbered 1 930 students (1 573 men).

13. Including 165 students (65 men) awarded CNAA certificates for which subject detail is not available.

1. England and Wales only; partly estimated.

2. In 1985-86, includes 1984-85 schools data for Scotland, and estimated data for the maintained sector in England and Wales.

3. Including nursery schools.

4. Excluding independent schools in Scotland and Northern Ireland.

5. Excluding Ulster Polytechnic. Figures include teacher training.

6. Excluding 640 male and female professors and lecturers and 5 083 part-time tutorial and counselling staff employed by the Open University at January 1986.

7. Totals include a number of teachers in England and Wales classified as miscellaneous who are not shown above (about 2 000 men and 1 800 women in 1985-86).

8. Excluding universities.

9. Excluding independent schools. Figures include unqualified teachers in England and Wales (about 1 000 in 1985-86).

10. England and Wales only up to 1983-84.

1. Excluding the Open University.

2. Overseas students are defined by fee-paying status. From 1980/81 most European Community students paid home fees and are therefore excluded from the overseas figures.

3. Includes Ulster Polytechnic which merged with the University of Ulster in October 1984.

4. Including 1 student in 1975/6 whose fee paying status was not known.

1. Excluding the Open University.

2. Includes Ulster Polytechnic which merged with the University of Ulster in October 1984. Data for some courses in the categories first diploma and others have been re-coded in 1985/86.

3. Stateless and unknown domicile included in the overseas figure.

4. Including those students on courses 'not of university standard', but not those sandwich students undertaking the industrial part of their training away from the university or college at the time of the student count, which is the end of the autumn term (31 December).

5. Excludes students whose type of residence is other than those listed or unknown.

1. The Science Research Council became the Science and Engineering Research Council from mid-1981, incorporating additional classifications.

2. Biotechnology was included in Other before 1983.

3. Until 1984 Chemical Engineering and Production Engineering were contained within the Engineering Processes Committee. In 1985 Engineering Processes reorganised, forming the Application of Computers to Manufacturing Engineering Directorate (ACME) and Process Engineering, which subsumed Chemical Engineering.

4. The Social Science Research Council became the Economic and Social Research Council on 1 January 1984.

1. Data refers to calendar year for 1974-75.

2. Postgraduate course awards made under Section 2 of the Education Act 1962 (excluding initial teacher training) in England and Wales (includes estimated numbers of new awards prior to 1975/76).

3. 'Comparable courses' are courses at establishments of further education which have been designated under the University and other Awards regulations, 1965, as comparable to first degree courses.

4. The adult education bursary scheme commenced in September 1975 and operates in England, Wales and Scotland.

5. United Kingdom estimate based upon data for England, Wales and Northern Ireland.

6. All data for 1985-86 are provisional.

Note: Because the figures have been rounded independently totals may differ from the sum of the components. Also the totals may include some employees whose industrial classification could not be ascertained.

1. Estimates of employees in employment up to June 1986 take account of the results of the 1983, 1984, 1985 and 1986 Labour Force Surveys. Estimates for later periods include an allowance for continued undercounting (see article on page 31 of *Employment Gazette* January 1987).
2. From October 1982 new basis (claimants); article in *Employment Gazette*, December 1982, page S 20 refers.
3. From October 1980 the figures are affected by the introduction in Great Britain of fortnightly payment of unemployment benefit. This is estimated to have resulted in an artificial increase of 20 000 (13 000 males and 7 000 females) in the count of the unemployed and therefore a corresponding reduction should be made when comparing the 1980 figures with those of earlier years.

4. From April 1983, the figures of unemployment reflect the effects of the provisions in the Budget for some men aged 60 and over who no longer have to sign on at an unemployment office. It is estimated that 132 500 men were affected over the period April to June 1983, and a further 29 300 were affected in July and August 1983, the total effect was a reduction in the coverage of the unemployment count of 161 800.
5. HM Forces figures, provided by the Ministry of Defence, represent the total number of UK service personnel, male and female, in HM Regular Forces, wherever serving and including those on release leave.

1. This occupational survey is carried out by the EITB in April every year on a sample basis. All the figures in this table are estimates based on this survey and other EITB data. For information about the detailed methods used please contact the Statistics Section, EITB, 41 Clarendon Road, Watford, Herts: Watford (0923) 38441.

2. Only that part of each industry which is in scope to the EITB is included in the figures.

3. Except works and other senior foremen and office supervisors, who are included in the preceding column.

4. Excluding canteen staff and seafarers.

5. Included in the previous columns.

- The figures include non-industrial and industrial staff but exclude casual or seasonal staff (normally recruited for short periods of not more than twelve months) and employees of the Northern Ireland Government.
- Part-time employees are counted as half units.
- The responsibilities for the Paymaster General's Office transferred from the Chancellor of the Exchequer's Departments to 'Other civil departments' on 1 July 1979 (868 staff) and are now included with 'Other civil departments'. The Treasury Solicitor was reclassified to 'Other civil departments' on 1 April 1981.
- Certain Civil Service Department (CSD) divisions, along with responsibility for CISCO, HMSO, COI and the Government Actuary's Department, were transferred to the Chancellor of the Exchequer (9 873 staff in all) on 7 December 1981. From the same date the Management and Personnel Office became responsible for CSD's work on efficiency and personnel management, recruitment and training (1 378 staff).
- On 1 April 1982, responsibility for the HMSO binderies was transferred to the British Libraries Board, and in Scotland, to the National Library of Scotland. A total of 160 staff have been excluded from the manpower count.
- As of 1 April 1984 the Victoria and Albert Museum and the Science Museum became non-manpower count bodies, they have been accorded Trustee Status – around 1 100 staff are involved.
- From 1 October 1980, certain staff in Property Services Agency (1 276 involved) have been excluded from the manpower count.
- With effect from 1 April 1981, some 765 non-industrial Environment/Transport common services staff employed on work for the Department of Transport and previously counted in the Department of the Environment, were instead included in the former's figures.
- With effect from 1 April 1982, the Department of the Environment transferred to the Countryside Commission, 96 staff formerly on

secondment to it; and hived-off the Hydraulics Research Station with its 244 staff. A total of 340 staff have been excluded from the manpower count.

- From 1 April 1984 approximately 1 100 staff of the Directorate of Historic Monuments and Ancient Buildings have been transferred to a new Commission outside the manpower count.
- From 1 April 1984 responsibility for the Passport Office was passed to the Home Office from the Foreign and Commonwealth Office (around 950 staff involved).
- 279 non-industrial staff employed in the Radio Regulatory Department of the Home Office were transferred to the Department of Trade and Industry in June 1983.
- Following the general election in June 1983 the former Departments of Trade and Industry merged.
- Departments of the Secretary of State for Scotland and the Lord Advocate.
- The State Hospital Carstairs was hived-off on 31 March 1984, around 400 staff were involved.
- Some 1 454 non-industrial staff employed in the Aviation and Shipping divisions of the Department of Trade were transferred in June 1983 to the Department of Transport.
- At 1 July 1984 a new department, Office of Telecommunications, was formed under the responsibility of the Secretary of State for Trade and Industry.
- On 2 January 1985 the Royal Ordnance Factories were incorporated as a Companies Act company and are no longer included in the manpower count.
- On 18 August 1986 a new department, the Office of Gas Supply, was formed under the responsibility of the Secretary of State for Energy.

1. About one third of all vacancies are notified to jobcentres. These could include some that are suitable for young persons and similarly vacancies notified to careers offices could include some for adults. Because of possible duplication the two series should not be added together. The figures represent only the number of vacancies notified by employers and remaining unfilled on the day of the count.

2. The methods used for compiling vacancy statistics have changed as from September 1985 and figures have been revised back to January 1980. See *Employment Gazette*, October 1985, page 413.

3. Owing to a change in administrative arrangements, there was an artificial increase in the April level of unfilled vacancies at jobcentres, but the recorded stocks of unfilled vacancies for May should be minimally affected.

Over 50 days	1 130	Over 50 days	1 130	44	208	167	206

Notes These figures exclude details of stoppages involving fewer than ten workers or lasting less than one day except any in which the aggregate number of working days lost exceeded 100. There may be some under-recording of small or short stoppages; this would have much more effect on the total of stoppages than of working days lost.
Some stoppages which affected more than one industry group have been

counted under each of the industries but only once in the totals.
The figures have been rounded to the nearest 100 workers and 1 000 working days; the sums of the constituent items may not, therefore, agree precisely with the totals shown.
Working days lost per thousand employees are based on the latest available mid-year (June) estimates of employees in employment.

1986	41.6	42.7	39.4	38.1	21.9	37.9	

1. The coverage of the 'certain other industries' changed in 1984.
2. The figures represent the average earnings, including bonus, overtime, etc., and before deduction of income tax or insurance contributions, in one week in the month indicated. Administrative and clerical workers and other salaried persons have been excluded, together with short-time workers.
3. The figures include overtime and correspond with those for average earnings. A full account of the survey relating to October 1986 was published in *Employment Gazette*, March 1987.

1. Results for manufacturing industries for 1981 and the first row of figures for 1982 relate to Orders III to XIX inclusive of the 1968 Standard Industrial Classification (SIC). Results for manufacturing industries for 1983 onwards and the second row of figures for 1982 relate to Divisions 2, 3 and 4 of the 1980 SIC.

2. The figures are gross before deductions. Generally they exclude the value of earnings in kind, but include payments such as overtime (except where otherwise stated), bonus, commission and shift premiums for the pay period.

3. The estimates given relate to employees for whom normal basic hours were reported and for whom total hours and hourly earnings could, therefore, be calculated.

4. Results for 1981-82 inclusive and the first row of figures for 1983 relate to men aged 21 and over. The second row of figures for 1983 and figures for 1984 onwards relate to males on adult rates.

5. Results for 1981-82 inclusive and the first row of figures for 1983 relate to women aged 18 and over. The second row of figures for 1983 and the figures for 1984 onwards relate to females on adult rates.

See Note on page 124.

1. England and Wales only.

2. Because of a dispute in the steel industry, insufficient information is available to enable reliable indices for 'Metal processing and manufacturing' to be calculated but the best possible estimates have been used in the compilation of the indices for manufacturing and whole economy. The index series for this group has a base of April 1980 = 100.

3. Excluding sea transport.

4. Excluding private domestic and personal services.

1. Results for 1979–82 inclusive and the first row of figures for 1983 relate to men aged 21 and over. The second row of figures for 1983 and figures for 1984 onwards relate to males on adult rates.

2. Of those whose pay for the survey pay period was not affected by absence. The figures are gross before deductions. Generally they exclude the value of earnings in kind, but include payments such as overtime, bonus, commission, and shift premiums for the pay period.

3. Including overtime hours and overtime pay, of persons for whom normal basic hours were reported and for whom hourly earnings could, therefore, be calculated.

6.17 Gross weekly and hourly earnings of full-time adults¹

1. For 1978 to 1983 men aged 21 and over, women aged 18 and over. For 1984 onwards men and women on adult rates.

2. Those whose pay in the survey period was not affected by absence. Weekly earnings figures refer to April in each year and are gross before deductions excluding, generally, the value of incomes in kind, but including bonus and commission payments for the pay period.

- The statistics relate to all organisations of employees with head offices in the United Kingdom—including those of salaried and professional workers, as well as those of manual wage-earners—which are known to include among their functions that of negotiating with employers with the object of regulating the conditions of employment of their members.
- Figures are confined to organisations which appear to satisfy the statutory definition of trade union in Section 28 of the Trade Union and Labour Relations Act 1974. This has had the effect of excluding 31 organisations which were previously regarded by the Department as trade unions e.g.

organisations representing members of the police service which are specifically excluded from the statutory definition by Section 30 of the 1974 Act.

- The figures of membership include the membership of branches in the Irish Republic and overseas but wholly exclude the membership of unions whose headquarters are situated outside the United Kingdom. A small number of people who are members of more than one union are included more than once in the figures, but the effect on the aggregates is relatively insignificant.

Source Department of Employment

7 Defence

This section includes figures on Defence expenditure, on the size and role of the Armed Forces and on related support activities.

Much of the material in this section can be found in Volume 2 of the *Statement on the Defence Estimates 1987 (Defence Statistics)* (CM. 101 – II) (HMSO 1987).

Formation of the Armed Forces (Table 7.1). This table shows the number of units which comprise the 'teeth' elements of the Armed Forces and excludes supporting units. Greater detail for the current year is given in Volume I of the *Statement on the Defence Estimates 1987* (CM. 101 – I).

Finance (Table 7.2). Expenditure covered by the Royal Ordnance Factories Trading Fund is excluded from 1975/76.

Service personnel (Tables 7.3 to 7.6 and 7.10). The Regular Forces consist entirely of volunteer members serving on a whole-time basis. The figures for females consist of all members of the Women's Services (i.e. WRNS, WRAC and WRAF) and female members of the Nursing Services. Certain male members of the RAF Medical Branch were transferred to the Princess Mary's RAF Nursing Service on 1 April 1980 and certain members of the RN Medical specialisation were transferred to the Queen Alexandra's Royal Naval Nursing Service on 1 April 1983 as a result of reorganisations. They continue to be shown in the male figures in Table 7.3 and are now included in the Nursing Services figures in Table 7.10. Certain professionally qualified female officers are not commissioned in the Women's Service, but in the appropriate branch or corps (i.e. medical, dental, legal, veterinary) and are not accounted for in the female figures. There were 193 such officers on 1 January 1987.

Locally Entered Personnel are recruited outside the United Kingdom for whole-time service in special formations with special conditions of service and normally restricted locations. The Brigade of Gurkhas is an example.

The Regular Forces are supported by Reserves and Auxiliary Forces. There are both regular and volunteer Reserves. Regular Reserves consist of former Service personnel with a Reserve liability. Volunteer Reserves are open to both former Service personnel and civilians. The call out liabilities of the various reserve forces differ in accordance with their roles.

All three Services run cadet forces for young people and the Combined Cadet Force, which is found in certain schools where education is continued to the age of 17 or above, may operate sections for any or all of the Services.

Deployment of Service personnel (Table 7.6). The source from which the individual national totals are compiled is different from that used to obtain the total United Kingdom strength and consequently the figures for England, Wales, Scotland and Northern Ireland do not add up to the United Kingdom figure. Royal Navy and Royal Marines personnel on board ship are included in the United Kingdom figure if the ship was in home waters on the situation date or otherwise against the appropriate overseas area. The overseas figures include personnel who are on loan to countries in the areas shown.

Service married accommodation and Defence land holdings (Table 7.7). Accommodation is provided for Service families in the United Kingdom and abroad, partly by building to approved standards and partly by renting accommodation. Permanent holdings in the United Kingdom include a small number of unfurnished hirings taken on from local authorities which are not recorded separately. Multiple hirings relate to accommodation built by private developers and leased by the Federal German Authorities and the Government of Gibraltar on behalf of British Forces.

The table also presents statistics of land and foreshore in the United Kingdom owned by the Ministry of Defence or over which it has limited rights under grants or licences. Land declared as surplus to Defence requirements is also included. At 1 April 1987 about 1 686

hectares were awaiting disposal by the Property Services Agency.

Civilian personnel (Table 7.8). This table gives an analysis of the number of civilians employed in the various management areas, viz Centre (those authorities not in the Service Departments, the Procurement Executive (PE) or the Royal Ordnance Factories (ROFs)), Royal Dockyards, Other Navy, Army, Royal Air Force (including the Meteorological Office), PE and ROFs. The attribution of civilian staff can change according to circumstances so that figures for successive years may not always be comparable.

Attention is drawn to the fact that the Royal Ordnance Factories changed from being part of MoD to independent Companies Act status on 2 January 1985. Staff employed at the factories are excluded from the MoD strengths from that date.

Some civilians from the United Kingdom serve tours of duty overseas. There were 5 303 such civilians serving abroad on 1 April 1987. Other civilian staff are engaged overseas to work locally as circumstances demand.

In addition Department of the Environment staff directly engaged on the Defence programme totalled 19 250 on 1 April 1987.

Health (Tables 7.9 to 7.11). The Services operate a number of hospitals in this country and in areas abroad where there is a significant British military presence. These hospitals take as patients members of all three Services and their dependants; in addition the hospitals in the United Kingdom take civilian patients under arrangements agreed with the National Health Service. Medical support is also supplied by Service medical staff at individual units, ships and stations.

Sickness, medical discharges and deaths of UK Service personnel (Table 7.11). It should be noted that, whereas the Royal Navy and Royal Air Force content is for all episodes of bedded sickness lasting two days or more terminating in the year, that for the Army covers only those cases admitted to medical units (including hospitals) for two days or more.

Search and rescue (Table 7.12). This table covers incidents in which Rescue Co-ordinating Centres (RCCs) in the United Kingdom co-ordinated search and rescue (SAR) action in which elements of the Armed Forces were involved. The table also includes urgent medical incidents in which the Forces SAR facilities gave assistance (e.g. inter-hospital transfers).

Defence services and the civilian community (Table 7.13). The Ministry of Defence helps the civil community in a variety of ways, for example by providing assistance in time of natural disasters or other emergencies and by undertaking community projects which are of training value to the Services. In some cases facilities established primarily for defence purposes also provide benefits to the general public. Overall figures are not available, but the table presents information on a number of these activities and facilities.

Service assistance may be provided during an industrial dispute at the request of the civil ministries in order to maintain services essential to the life of the community (e.g. maintenance of emergency fire services in 1977/78).

The Royal Navy Fishery Protection squadron operates within the United Kingdom fishery limits on behalf of Fishery departments, who pay some of the running costs of the squadron.

The Hydrographer of the Navy is the national authority responsible for hydrographic and oceanographic surveys and nautical charting. The Admiralty chart series comprises some 3 400 basic charts and 600 latticed versions covering the whole world.

Defence energy consumption (Table 7.14). Consumption is expressed in terms of the System International (SI) unit of energy, the joule. The table has been re-designed to distinguish between fuels used for operational purposes and non-operational purposes.

1. Expenditure as given in the annual Appropriation Accounts for the Defence Votes, Class I.
2. Including expenditure of government departments other than the Ministry of Defence in years when these contributed to the Defence budget.
3. Because of changes in the responsibilities of the Ministry of Defence, expenditures in successive years are not necessarily comparable.

4. Prior to 1976/77 the dockyard services element of the sea systems expenditure was included under other equipment.
5. Including pay of civilian staff employed in works and building.

1. From 1982 the England, Wales and Scotland national figures include personnel who were UK based but temporarily deployed in the South Atlantic. These have been included also in the Overseas numbers against 'Other locations'.
2. The figures for Northern Ireland include all personnel from other parts of the United Kingdom and the British Army of the Rhine who are serving on emergency tours of duty, but exclude the Ulster Defence Regiment.
3. Army personnel serving in Northern Ireland on emergency tours of duty but remaining under the command of the Commander-in-Chief British Army of the Rhine are included in these figures.
4. These figures include personnel stationed in Berlin and Sardinia.
5. These figures include Defence Attaches/Advisers and their staffs.
6. The 1982 figures comprise Gurkha troops serving in the Falkland Islands.

1. Up to 1980, these are the numbers of approved beds. From 1981 they are the numbers of available beds.

2. Based on the numbers of beds as defined above.

3. In addition 30 900 patients were seen at outlying clinics of the hospitals and some 8 200 day patients were treated in the UK and 3 100 overseas in 1986.

1. Regular Service personnel only. Includes all deaths whether occurring on or off duty.
2. Code numbers refer to the Ninth Revision (1975) of the *International Statistical Classification of Diseases, Injuries and Causes of Death*. Prior to 1979 the Eighth Edition was used and this may mean that some groups of diseases are not exactly comparable, the changes however are small.
3. Figures for the latest year are provisional.
4. Based upon spells of bedded sickness lasting two days or more terminating during the year except for the Army, where the coverage is for admissions to medical units for two days or more.

5. Where an injury could be classified under more than one cause it is shown under the first listed cause. Figures by cause for 1980 onwards are not directly comparable with those for previous years because of changes to improve the method of classification.
6. Used where no classifiable diagnosis is reported or where the person is not sick, e.g. admissions for investigation, preventive measures or elective surgery.

by mountain rescue teams ³	11	18	79	12	21	19	63	18	31	14	14

1. More than one element of the search and rescue services may be called out to a reported incident.

2. Prior to 1977 these figures are estimated numbers of journeys based on the reported flying hours and the average flight length.

3. Royal Air Force only.

4. Figures for persons rescued relate only to number of persons who were actually removed (alive) from a hazard or who were assisted in an urgent medical incident.

1. Petajoules = 10¹⁵ joules.

2. Royal Navy figures include the Royal Dockyards.

3. Up to January 1985 when the ROFs became a Companies Act company.

4. Non-operational energy is that energy used for domestic purposes, space heating, lighting and the operation of plant and machinery; it does not include energy used for the propulsion of vehicles, weapons, aircraft or ships.

5. Other than that used by the Fleet.

8 Production

Censuses of Production (Table 8.1)

The Census of Production provides summary information about the structure of industry in the United Kingdom. The results meet a wide range of needs for government, economic analysts and the business community at large. In official statistics the censuses are an important source for the national accounts and input-output tables, but they also provide weights for use in compiling the indexes of production and producer prices. Census results also enable the United Kingdom to meet the statistical requirements of the European Community.

In 1970 the earlier series of quinquennial censuses was replaced by a new system of production statistics. This took the form of a simplified annual census supplemented by a quarterly inquiry into manufacturing sales and an occasional purchases inquiry. During its early years the annual census covered in general all establishments with 25 or more employees, but this was reduced to 20 employees for the 1973 and subsequent censuses. For the 1978 and 1979 Censuses in 68 selected manufacturing industries, coverage of establishments in the 20 to 49 employment size band were reduced to a 1 in 2 sample. A still wider use of sampling was applied for most industries in the 1980 to 1983 censuses, with a 1 in 4 selection in the 20 to 49 employment size band and a 1 in 2 selection for the 50 to 99 employment size band. Sampling for the benchmark census of 1984 followed the same pattern as 1979 i.e. a 1 in 2 sample for establishments in the 20 to 49 employment size band and the latest census for 1985 follows the

1980–83 pattern. For industries with fewer records in the sample size bands, all establishments employing 20 or more receive a form.

Currently census results are published in the Business Monitor series and appear as 110 individual industry reports and a summary volume.

Index of output of the production industries – selected component indicators (Table 8.2)

Table 8.2 shows selected component series of the index of output of the production industries (see Table 14.6 and paragraphs 11 to 16 on pages 238/239). However, these component series do not include adjustments to correct mixed sales and production data to true production index numbers (see paragraph 13 on page 238) because they are at a too disaggregated level: consequently, they are not strictly comparable with index of output of the production industries aggregates shown in Table 14.6.

The weight shown against each component industry is proportional to its contribution to gross domestic product at factor cost in 1980, expressed as parts per thousand of the index of output of the production industries (revised definition comprising energy and water supply and manufacturing), which is shown in Table 14.6.

The coverage of the component series is in accordance with the *Standard Industrial Classification Revised 1980* (HMSO) to which reference should be made for details of the composition of each SIC(80) industrial group.

1. Figures for gross output include a substantial amount of duplication represented by the total value of partly manufactured goods sold by one industrial establishment to another. The extent of duplication varies from one census industry to another.

2. The figures include working proprietors but exclude outworkers.

3. Figures for mineral oil and natural gas not included.

4. Figures for stocks and work in progress exclude water undertakings and work in progress in the gas industry.

5. Figures for stocks and work in progress exclude goods on hand for sale.

1. These indices are components of the index of the output of the production industries (revised definition) (see Table 14.6). However, they do not include an adjustment to correct mixed sales and production data to true production index numbers: consequently, they are not strictly comparable with index of output of the production industries series. See paragraphs 11 to 16 of the notes on pages 238 and 239.

2. The Group numbers are those of the Standard Industrial Classification 1980.

3. Parts per 1 000 of the index of output of the production industries (revised definition) shown in Table 14.6.

4. Figures for years prior to 1978 have been linked to data based on minimum list headings of the Standard Industrial Classification 1968 and are therefore only approximations.

5. Machinery for food, chemical and related industries; process engineering contractors.

1. Estimates of the gross calorific values used for converting the statistics for the various fuels to therms are given in the *Digest of United Kingdom Energy Statistics 1987*.

2. Including net trade and stock change in other solid fuels.

3. Refinery throughput of crude oil, plus net foreign trade and stock change in petroleum products. Liquid fuels derived from coal (which are included in coal consumption) and petroleum products not used as fuels (chemical feedstock, industrial and white spirits, lubricants, bitumen and wax) are excluded.

4. Primary electricity comprises UK produced nuclear and hydro-electricity plus net imports of electricity. The figures represent the notional thermal input of fossil fuel that would have been needed to produce the same quantities of electricity at the efficiency of contemporary UK conventional steam power stations.

5. Natural gas includes both indigenous and imported natural gas and colliery methane piped to the surface and consumed at collieries or sold.

6. Including briquettes, ovoids, Phurnacite, Coalite, Rexco, etc.

7. Figures for Natural gas include Town gas. For 1986 consumption of Town gas was 14m therms. Data for consumption of Town gas in previous years may be found in earlier editions of this publication.

8. Liquid fuels derived from coal.

9. Includes natural gas from 1984. Prior to 1984 natural gas used in agriculture is included under Miscellaneous.

TIME SERIES. Figures relate to periods of 52 weeks.

1. Includes quantities used in the production of steam for sale.
2. The figures relate to colliery and opencast disposals to industry.
3. The figures relate to colliery and opencast disposals for the domestic market.
4. Including disposals of imports.
5. Great Britain. Stock change excludes industrial and domestic stocks.
6. This is the balance between supply and consumption, shipments and changes in known distributed stocks.
7. Figures for stocks at end of year for 1978 relate to position at 23 December. Stock change in 1979 is calculated on stocks at 30 December 1978. Figures for stocks at end of year for 1983 relate to position at 24 December.

TIME SERIES. Figures relate to periods of 52 weeks.

4. With effect from 1985/86 the National Coal Board altered their regional structure and incorporated Barnsley into North Yorkshire, Doncaster into South Yorkshire and merged North and South Nottingham into Nottingham.

1. Collieries operated by the National Coal Board. Excludes coal extracted in work on capital account (0.68 million tonnes in 1982/83).
 2. See footnote 2 to table 8.7.
 3. Production was affected by a national overtime ban from 1st November 1983 and by wider industrial action from 12th March 1984.

1. Butane, propane, ethane and refinery tail gases.

2. Including substitute natural gas.

3. Used in works, offices, showrooms, etc.

4. Supply greater than recorded demand (—). Includes losses in distribution.

5. Prior to 1984, included in Other industries under Final users.

6. Prior to 1984, as reported by the Iron and Steel Statistics Bureau.

7. Prior to 1984, included in Miscellaneous.

Note: The breakdown of consumption by industrial users is made according to the 1980 Standard Industrial Classification, though only data for the years 1984 and 1985 are available on this basis.

System load factor ³ (Percentage)	55.7	56.6	56.1	59.4	58.0	56.0	57.1	58.0	54.1	57.8	56.1

1. Public supply stations only.

2. Maximum occurring near the end of the year, or early in the following year.

3. The system load factor is the average hourly quantity of electricity sent out during the year (including purchases from other sources) expressed as a percentage of the maximum potential demand nearest the end of the year or early the following year.

1. The term indigenous is used in this table for convenience to include oil from the UK Continental Shelf as well as the small amounts produced on the mainland.

2. Crude oil *plus* condensates and petroleum gases derived at onshore treatment plants.

3. Includes process (partly refined) oils.

4. Includes condensate for distillation.

5. Mainly recycled products.

6. Foreign trade as recorded by the petroleum industry and may differ from figures published in *Overseas Trade Statistics*.

7. Re-exports of imported crude which may include some indigenous oil in blend.

8. International marine bunkers.

1. Crude and process oils comprise all feedstocks, other than distillation benzines, for treatment at refinery plants. Refinery production does not cover further treatment of finished products for special grade such as in distillation plant for the preparation of industrial spirits.

2. Comprising 2 285 thousand tonnes gases, 2 134 thousand tonnes fuel oil and 985 thousand tonnes other products in 1986.

Time series. The figures relate to periods of 52 weeks (53 weeks in 1981).

Note: Figures in the above table have been amended to reflect the Iron and Steel Statistics Bureau's revised definition of the iron and steel industry.

1. Increases in stock are shown as + and decreases in stock (i.e. deliveries from stock) as —.
2. Includes liquid steel for castings.

- Unwrought copper (electrolytic, fire refined and blister).
- Reported stocks of refined copper held by consumers and those held in London Metal Exchange (LME) warehouses in the United Kingdom.
- Copper content.
- Consumption for high-conductivity copper and cadmium copper wire represented by consumption of wire rods, production of which for export is also included.
- Lead reclaimed from secondary and scrap material and lead refined from bullion and domestic ores.
- From 1975, figures for production and consumption of refined lead include antimonial lead, and for scrap and remelted lead, exclude secondary antimonial lead.
- Including toll transactions involving fabrication.

- Excluding government stocks.
- Includes values for White Lead w.e.f. 1986.
- Including production from imported scrap and residues refined on toll.
- Primary and secondary metal.
- Including re-exports on toll transactions.
- Including primary alloys.
- Includes wrought, cast and forged products, and excludes foil products.
- Includes foil stock and excludes foil products.
- Excluding forging bars, wirebars, and almost two-thirds of despatches of hot rolled rod.
- Primary and remelt alloys.
- Despatches to consumers of primary metal, primary and remelt alloys.
- Data no longer obtainable.

TIME SERIES. Figures for consumption of raw cotton, and production and consumption of cotton and man-made fibre yarn are for periods of 52 weeks (53 weeks in 1975, 1980 and 1986).

- From 1978 figures for consumption of raw cotton are for calendar months.
- Figures are based on returns from producers (excluding waste) and include all man-made fibres in commercial production.
- Excluding waste yarns.
- Yarns wholly of cotton waste, cotton yarn spun on condenser system and mixture yarns of cotton and cotton waste.
- Average of numbers running in last week of each month. Waste spinning spindles are excluded.

6. Figures prior to 1982 are not provided.

7. Estimated.

8. Including imported wool and wool from imported skins, scoured, etc. in the United Kingdom.

9. Including noils, broken tops, wastes, mungo and shoddy.

10. Including all yarn spun on the worsted system.

11. Includes mixture and man-made fibre fabrics classified as wool or worsted, but excludes blankets.

TIME SERIES. Figures for wood chipboard relate to periods of 52 weeks (53 weeks in 1976 and 1982).

1. Up to and including 1979 sales of home-grown timber and of plywood are by firms employing 25 or more people and from 1980 by firms employing 35 or more people.

2. Home-grown excludes mining timber and relates to sawn and planed only. From 1976, home-grown hardwood also excludes planed timber.

3. Up to and including 1978 woodchip board figures are in thousand tonnes.

4. Reduction due to the miners' strike.

1. Unless separately specified, all figures are in terms of net resin content and co-polymers are recorded against the heading for resins made from the major monomeric ingredient of the co-polymer.
2. From 1981 figures relate to establishments with a minimum employment level of 75. Previous figures were based on a minimum of 25 persons.

3. Include production of polymers and co-polymers of polyamide and polyester by firms classified to man-made fibre industry.
4. Totals do not include suppressed figures.
5. Data suppressed for disclosure reasons.

1. The figures are summaries of returns made by manufacturers and producers. They represent total production and not merely the quantities available for building purposes.

2. United Kingdom.

3. Including sand used in the production of sand lime bricks.

4. From 1979 figures represent volume sold, not production.

5. Figures include hoggins, concrete aggregate, other purposes (excluding fill) and fill.

6. From 1979 figures represent volume sold, not production.

7. Figures represent volume sold, not production.

8. The 1985 and 1986 figures refer to slates used for architectural and cladding uses, roofing and damp proof courses.

9. Figures relate to the production of copper tubes for all purposes including those used in the construction industry.

10. Series discontinued.

11. Provisional.

Note More detailed information can be found in the PQ series of Business Monitors for the activities listed above.

1. These figures represent the total sales of principal products of each activity excluding waste products and work done. Estimates of the sales of principal products of establishments falling below the employment threshold of the Quarterly Sales Inquiries are included.
2. The total may differ from the sum of its constituent parts due to rounding.
3. Excluding ferrous and non-ferrous metal foundries AH 3111/2.
4. Excluding process engineering contractors AH 3246.
5. Excluding electrical equipment installation AH 3480.
6. Excluding shipbuilding and repairing AH 3610.

1. Vessels of 100 gross tonnes or more, including fleet auxiliary vessels registered as merchant ships.

2. From 1984 tonnages conform to the new measurement system as prescribed under the 1969 International Maritime Organisation Convention.

3. Includes vessels which may have been cancelled at a late stage.

4. Includes crude oil tankers, chemical tankers, product tankers, and gas carriers, of 300 gross tonnes and over.

5. Tonnages are only accurately measured on completion, prior to which they should be regarded as only approximate.

6. Includes bulk carriers and coasters of 300 gross tonnes or more, colliers, container ships, passenger liners, and passenger/cargo liners.

7. Includes dredgers, ferries, offshore supply vessels, tankers and coasters under 300 gross tonnes, trawlers, tugs and other miscellaneous vessels.

8. Vessels for overseas registration. Commonwealth countries though are entitled to register vessels under the United Kingdom flag.

9. Includes both vessels under construction and those not yet commenced.

1. Potable spirits distilled including spirits produced from molasses.

2. Includes a small amount of spirits unclassified by origin and/or tariff code number.

3. Before April 1983, the figures represent quantities of all mature home produced spirits.

4. From January 1976 the figures take account of brewing at high gravity with the addition of some brewing liquor after fermentation.

9 Agriculture, fisheries and food

Agricultural censuses and surveys (Tables 6.5, 9.3 and 9.5)

The data in these tables vary between the different countries of the United Kingdom as follows:

The coverage from 1976 to 1979 includes all holdings in the United Kingdom with 40 standard man days or more (a standard man day (smd) represents 8 hours productive work by an adult male worker under average conditions). All holdings with less than 40 smd in Scotland are excluded but in England and Wales and Northern Ireland holdings with less than 40 smd are excluded only if they have less than 4 hectares of crops and grass and no regular whole-time worker.

From 1977 (table 9.4 from 1980) figures for England and Wales relate to all known agricultural holdings including minor holdings. Data on minor holdings in Scotland and Northern Ireland are excluded but see footnote 2 to table 9.4.

From 1981 the figures included for Northern Ireland relate to all holdings with one European Size Unit (ESU) or more; or 6 hectares or more of total area; or one or more whole-time workers (excluding the owner). This revised threshold resulted in the deletion of 7 000 holdings.

The estimated yields of sugar beet and hops (table 9.4) are obtained from production figures supplied by British Sugar plc, and English Hops Ltd. In Great Britain potato yields are estimated in consultation with the Potato Marketing Board.

Average weekly earnings of agricultural workers (Table 9.7)

Data on the earnings of agricultural workers have been collected since 1945 through a series of investigations known as the Wages and Employment Enquiry. Appointed officers of the Ministry of Agriculture, Fisheries and Food, the Department of Agriculture and Fisheries for Scotland and the Welsh Office Agricultural Department undertake this series of investigations in the course of their duties as Wages Inspectors. Under the Agricultural Wages Act 1948, these officers monitor minimum wages determined by the Agricultural Wages Board. They visit a random sample of farms each year (approximately 4 000 in 1986) and collect information on workers' earnings, hours, overtime, bonuses, perquisites, etc.; the analysed results of which are published in quarterly press notices and annual reports. Summary tables of earnings and hours are also published by the Department of Employment, the Welsh Office Agricultural Department and the Department of Agriculture and Fisheries for Scotland. The enquiry also provides data used by the Agricultural Wages Board when considering wage claims and by the Ministry in estimating the cost of labour in agriculture for the Annual Review and similar purposes.

Fisheries (Tables 9.12–9.14)

Data relating to the weight and value of landings of fish in United Kingdom (table 9.12) is generally obtained from sales notes completed at fish market auctions.

Fishing fleet information (tables 9.13 and 9.14) is obtained from vessel registers maintained by the Ministry of Agriculture, Fisheries and Food in England and Wales and the Department of Agriculture and Fisheries for Scotland.

Estimated food consumption by all households in Great Britain—National Food Survey (Table 9.17)

The Sample

In the course of a year the National Food Survey investigates the food budgets of about 7 500 households throughout Great Britain. Fieldwork takes place in 52 local authority districts selected so as to be representative of Great Britain as a whole and, from the beginning of 1986, a proportion of the local authorities used are replaced for sampling purposes at the end of each calendar quarter. A description of the sampling methods used in the National Food Survey is given in the respective Annual Reports: for example, *Household Food Consumption and Expenditure* (HMSO 1987).

Household

A group of persons living in the same dwelling and sharing common catering arrangements. The size of household is defined in terms of the number of persons who spend at least four nights in the household during the week of the Survey and also have at least one meal a day from the household food supply on at least four days. The head of the household and the housewife are regarded as persons in all cases.

Adult—A person aged 18 years or over.

Child—A person under 18 years of age.

Food purchased

Quantities of all foods purchased during the week for consumption in the home (but including purchases of milk at school). The Survey excludes food eaten outside the home (except packed meals prepared at home), chocolate and sugar confectionery, soft drinks, alcoholic drinks, vitamin preparations, and food obtained specifically for consumption by domestic pets. For a few minor miscellaneous items, expenditure is recorded, but not the quantity (e.g. artificial sweeteners, flavourings, colourings, etc.).

Free food

Quantity of food entering the household without payment, for consumption during the Survey week. Milk supplied under the Milk in Schools Scheme is included although it does not actually enter the household. Food grown or produced by the household and stored in bulk is recorded only when it is withdrawn from store.

Consumption

Averaged over a sufficiently large number of households and a sufficiently long period, the average quantity of food purchased plus the quantity of 'free' food will equal the average consumption if there is no general change in the level of larder stocks.

- Output values include subsidies on products sold. Output is net of VAT collected on the sale of inedible products, which is repaid by HM Customs and Excise.
- Forecast prepared in November 1986.
- Includes receipts from crops sold off farms and subsequently bought back for feed and seed; excludes deficiency payments on retained cereals and compensation payments on unsold potatoes which are included under Sundry receipts.
- Maize, mixed corn, rye, hay and dried grass, grass and clover seed and other farm crops.
- Flowers, bulbs, nursery stock, etc.
- Horses, breeding animals exported, poultry for export, rabbits and game, knacker animals and other minor livestock.
- Honey, goat's milk, exports of eggs for hatching and other minor livestock products.
- That part of investment in buildings and works which is physically undertaken by the farmer or farm labour and the value of the physical increase in breeding livestock (breeding livestock capital formation).
- Dividends from agricultural co-ops, non-agricultural horses grazing and includes from 1981 annual payments made under the sheep meat régime.
- Hill livestock compensatory allowances, aid to less favoured areas and other non-capital production grants.

- Livestock except breeding livestock.
- Stocks of cereals, potatoes and fruit.
- Sales included in output but subsequently repurchased and so reappearing as input.
- Cereals, potatoes, beans, hay and dried grass.
- Expenditure is net of VAT reclaimed in the normal way, but each heading includes VAT paid without recovery by, for example unregistered producers.
- Electricity, veterinary expenses, pesticides, rates, insurances and miscellaneous costs.
- Input stocks comprise fertilisers and purchased feed.
- Includes employers' national insurance contributions. The estimate in respect of family workers (except spouses) and partners is calculated on the basis of the earnings of hired labour.
- On commercial debt for current farming purposes (i.e. excluding interest on land purchases but including interest on purchases of buildings and works).
- Landlords' expenses are included within farm maintenance, miscellaneous expenditure and depreciation on buildings and works. Net rent is rent paid on tenanted land *less* these landlords' expenses and the benefit value of dwellings on that land.
- The income of farmers and their spouses after providing for depreciation and payment of interest and excluding stock appreciation.

1. Figures from 1977 onwards include estimates for minor holdings not surveyed at the June census in England and Wales. See notes on page 175.

2. Prior to 1986 collected as 'Beans for stockfeeding' in England and Wales.

3. See footnote 5 to table 9.4.

4. Includes 'Peas for harvesting dry for both human consumption and stockfeeding' from 1984 onwards.

5. Figures relate to land usage at 1 June and are not necessarily good indicators of production as for some crops more than one crop may be obtained in each season or a crop may overlap two seasons.

6. Excludes kale from 1983 which is included with 'Other vegetables'.

7. From 1983 included with 'Other vegetables.'

8. Following a change in definition in 1986 'Peas for harvesting dry for human consumption' is now included with 'Peas harvested dry for stockfeeding'. Data from 1984 reflect this change.

9. Collected as 'Woodland ancillary to farming' in Scotland prior to June 1976.

1. UK gross production in calendar years; for horticultural crops it is in crop years.
2. Except for sugar beet and hops, the production area for England and Wales is the area returned at the June census together with estimates for very small holdings (known as minor holdings). In Scotland and Northern Ireland the area returned at June is also the production area except that estimates for minor holdings are included in Scotland for potatoes and in Northern Ireland for barley, oats and potatoes.
3. From 1979 maize for threshing is included with maize for stockfeeding.
4. Revised basis of calculation adopted in 1984 which prevents direct comparison with earlier years.
5. Before 1977 fodder beet was included with turnips and swedes for stockfeeding. In 1977, as a result of changes in the census categories,

fodder beet was included with mangolds in England and Wales but continued to be included with turnips and swedes for stockfeeding in Scotland and Northern Ireland. Scotland collected fodder beet separately for the first time in 1986.

6. The production area for sugar beet is provided by British Sugar plc.
7. The production area for hops is provided by English Hops Ltd.
8. The production of hay in England and Wales is calculated from the area cut for hay and actually harvested and does not include the area mown for silage, drying or seed; the production of hay in Scotland and Northern Ireland is calculated from the area cut for hay only and does not include grass mown for silage or drying.
9. Provisional figures.

- 1. Includes unproductive woodland. A reduction to unproductive land was made in 1978 to adjust for a reclassification of this land to meet the figure of 'Retained Scrub' published in the *Forestry Commission Annual Report*.
- 2. The figures for Northern Ireland refer to year ending 30 September up to and including 1975/76, to year ending 31 December up to and including 1980, and thereafter to year ending 31 March.
- 3. Net area acquired.
- 4. Including areas replanted.
- 5. Calendar year ending previous December.
- 6. The apparent increase in 1982/83 is a result of data from the Census of Woodlands and Trees becoming available. The change is entirely in the private sector of the industry.

TIME SERIES. The figures for cereals and for animals slaughtered relate to periods of 52 weeks (53 weeks in 1976 and 1981).

1. Flour millers' receipts of home-grown wheat.
2. Oatmeal millers' receipts of home-grown oats.
3. Human consumption of UK produced potatoes.
4. The method of calculating liquid milk has been revised from April 1981 to include a measurement adjustment. Therefore the total of liquid and manufactured milk do not add up to the total.
5. Provisional.

1. Contains some provisional information.
2. Including the raw equivalent of any liver oils landed.
3. Includes transshipments of mackerel or herring i.e. caught by British vessels but not actually landed at British ports. These quantities are transhipped to foreign vessels and are later recorded as exports.
4. The weight of oysters is calculated on the basis of one tonne being equal to 15 748 oysters in England and Wales.
5. 1986 data may include some prawn data.

Note For further details contact Mr K Williamson, MAFF
(Telephone: 01-270 8559)

1. Provisional.
2. Total supplies for home use, including sugar content of imported manufactured foods, less sugar used in the production of alcoholic drink.
3. Figures for 1980 onwards are not comparable with those for earlier years because of a revised method of estimating supplies for human consumption of offal, cocoa butter and cocoa powder, and sugar.
4. Figures for 1980 onwards for other canned vegetables are not comparable with those for earlier years as they now represent net imports of processed vegetables.

5. From 1980 onwards, spirits are measured in litres of pure alcohol.
6. Estimates for 1980–1986 are based on updated factors and also include in the nutrient totals the contribution from alcoholic drink. An indication of the net effect of these changes is provided by the following figures for 1980 which are on the old basis: 81.7, 128, 363, 11 920, 727.
7. Available carbohydrate expressed as monosaccharides.

Note: The 1985 and 1986 figures are not yet available. For further details contact Mr K. Williamson, MAFF (Telephone: 01-270 8559)

1. Provisional.

2. At farmgate or landed value.

3. Taxes on food have been deducted and the value of subsidies added.

4. Derived as the difference between 'Total final expenditure on food' and 'All food consumed in the United Kingdom'. The latter is based on supplies data adjusted for known changes in stocks. These, however, are known to be incomplete (retailers' stocks are a particular omission); hence when stocks are increasing, 'Cost of processing and distribution' will tend to be understated, when they are being run down (e.g. in 1980) it will tend to be overstated.

Pipelines ⁴	53	75	83	85	83	75	78	82	88	89	79

1. Water figures are provisional for 1986.

2. British Rail only. Traffic was affected by ASLEF industrial action in 1982 and by the miners' strike and associated action by BR staff in 1984 and 1985.

3. Revised series. 'Other' comprises non-oil coastwise traffic and all coastwise traffic with Northern Ireland, Isle of Man and Channel Islands and one-port traffic as well as traffic in inland waterways.

4. Excluding movements of gases by pipelines.

Pedal cycles	4	5	4	4	4	4	5	5	5	5	4

1. Domestic scheduled and non-scheduled services, including Northern Ireland, Isle of Man and Channel Islands.

2. British Rail, London Regional Transport and Passenger Transport Executive railway systems. The basis of calculating London Regional Transport railways' passenger kilometres has been revised from passenger kilometres paid for to passenger kilometres travelled. During 1982, British Rail traffic was affected by industrial action which took place on 34 days.

3. Calculated from operators' returns of numbers of passengers carried, using estimates for average length of journey.

4. Based on statistics of vehicle mileage derived from the traffic counts and estimates of average numbers of persons per vehicle, derived from the National Travel surveys.

1. Since 1978, censuses have been taken annually in 31 December and are obtained from a full count of licencing records held at DVLC Swansea. Prior to this, figures were compiled from a combination of DVLC data and records held at Local Taxation offices. Consequently pre-1978 figures are not strictly comparable. No census results are available for 1977.

2. Excludes vehicles officially registered by the armed forces.

3. Includes taxis also used privately.

4. As a result of changes in the taxation system since October 1982, about 970 000 vans and light goods vehicles previously licensed as Goods vehicles, have now been regrouped, together with 14 000 newly licensed goods vehicles under the heading private and light goods; which has replaced the old private category. Figures for previous years have been estimated to provide a continuous series of data.

5. Includes agricultural vans and lorries, showmen's goods vehicles licensed to draw trailers.

6. Includes combine harvesters, mowing machines, digging machines, mobile cranes and works trucks.

7. Includes three wheelers, pedestrian controlled vehicles and showmen's haulage.

8. From 1979 includes exempt tax classes 61 and 62 not previously included and from 1980 includes electric vehicles which are now exempt from licence duty.

1. Including personal and direct export vehicles.

2. Estimates of the total of vehicles within the Private and light goods taxation class, and within the Other goods class were estimated by assuming that all goods vehicles less than 1.5 tons unladen weight would have been registered in the Private and light goods class if it had existed prior to October 1982 when it first became effective.

3. Owned by a farmer and available for hauling produce and requisites for his farm.

4. Agricultural tractors are excluded unless driven on public roads.

5. Includes three wheelers, pedestrian controlled vehicles, general haulage and showmen's tractors.

6. From 1980 includes electric vehicles which are now exempt from licence duty.

1. Accidents on public roads, involving injury, which are reported to the police.
2. 1½ tons unladen weight and under.
3. Over 1½ tons unladen weight.
4. Died within 30 days of accident.
5. Hospital inpatients plus casualties with any fracture, internal injury, concussion, crushing, severe general shock, etc, plus deaths after 30 days.

6. These figures may not add up to total fatal and serious figures, due to the exclusion of road users whose age was not reported.
7. Age 0 – 14.
8. Positive result, or refused to provide a specimen.

1. Figures at 31 March of the following year.

2. Excludes three narrow gauge steam locomotives.

3. Includes shunting locomotives.

4. Diesel multiple unit power cars except for small number of non-passenger-carrying power cars (26 in 1986).

5. Electric multiple unit power cars except for small number of non-passenger-carrying power cars (23 in 1986).

6. Excludes 16 narrow gauge passenger carriages.

7. Includes Diesel multiple unit power cars (1 825 in 1986, also included under Tractive units—Power cars—Diesel).

8. Includes Electric multiple unit power cars (2 516 in 1986, also included under Tractive units—Power cars—Electric).

9. Excludes one narrow gauge non-passenger-carrying vehicle. Includes Advanced Passenger Train and High Speed Train power cars; also includes non-passenger-carrying power cars (26 diesel, 23 electric in 1986 which are also shown under Tractive units, Power cars); also includes brake vans (684 in 1986).

10. Excluding narrow gauge route open to traffic (19 kilometres in 1986).

11. Combined passenger and freight stations have been reclassified as single purpose stations over the period.

1. British Rail traffic was affected by industrial action by ASLEF in 1982 and by the miners' strike and associated action by British Rail staff in 1984 and 1985.

2. Grants received by British Rail in respect of certain subsidised passenger services are not included in passenger receipts.

3. The receipts and passenger kilometres include an appropriate proportion in respect of through bookings with the railways of London Regional Transport and other administrations. Passenger journeys in respect of such through bookings are included. In 1985, 697 million journeys originated on British Rail only. From 1979 season ticket journeys include those in respect of West Midlands travel cards.

4. Miscellaneous receipts include charges for platform tickets, seat reservations, demurrage, provision of shunting services, etc. From 1980 Miscellaneous receipts are apportioned between the sectors.

5. All season ticket journeys and passenger kilometres were calculated on a rate of 480 journeys per year per annual season ticket and 540 journeys for shorter period tickets. Return tickets have been counted as two journeys.

6. Excluding free-hauled traffic on freight trains.

7. Excluding freight carried by coaching trains. In 1978 the method of estimating tonne-kilometres was changed to reflect the changing pattern in the operational working of freight trains. Pre-1978 figures have been re-estimated to bring them approximately onto the same basis as 1978 and subsequent years and rounded to the nearest 100 million.

1. British Rail traffic was affected by industrial action by ASLEF in 1982 and by the miners strike in 1984.
2. Train kilometres worked by British Rail trains over all lines including certain London Regional Transport lines.
3. Non-passenger trains consist of vehicles for the conveyance of freight at coaching train rates.
4. Excludes free-hauled traffic on freight trains. From 1978, figures have been revised to reflect a change in the calculation of loaded train kilometres for 'Merry-Go-Round' coal traffic to power stations.

1. The receipts and passenger kilometres include an appropriate proportion in respect of through bookings from British Rail. Passenger journeys in respect of such through bookings are included.
2. Season ticket journeys and passenger kilometres are calculated on the basis of 600 journeys per annum.
3. Train and place kilometres include kilometres run by London Regional Transport trains over British Rail lines.
4. Assuming full loads with standing passengers travelling in reasonable comfort; under crush load conditions the trains carry up to 50 per cent more passengers for short distances.

1. These operations exclude British Airways and British Airways Helicopters.

2. The considerable increase in stage flights on domestic services and a similar reduction on international services in 1984 is mainly due to the reclassification of certain operations from international to domestic w.e.f. January, 1984.

1. Domestic traffic refers to traffic, through the ports of Great Britain only, to all parts of the United Kingdom, Isle of Man and the Channel Islands. Traffic to and from offshore installations, landing of sea dredged aggregates and material shipped for dumping at sea are included.

2. Including crates and immediate packaging.

3. Previous to 1980 included in conventional traffic.

Note

The mode of appearance classification was introduced by the Department of Transport and the British Ports Association from 1982 onwards and corresponds with similar classifications used in other countries including the Statistical Office of the European Communities. It refers to the way cargoes are presented for loading/unloading at ports. Primarily, it distinguishes between bulk and break-bulk cargoes but the latter are further sub-divided into categories which are more meaningful to ports, shipping and inland transport from an operational point of view. Further details of this new classification are provided in *Port Statistics 1986* available from the British Ports Association, London.

- Years ended 31 March for letter and parcel post, postal orders and telegrams sent. For all other items figures relate to 31 March in each year.
- Including printed papers, newspapers, postcards and sample packets.
- Including letters without special charge for air transport.
- Includes Irish Republic inward traffic.
- Includes compensation fee parcels.
- Excluding those issued on HM ships, in many British possessions and in other places abroad. For 1980, 1981, 1984, 1986 and 1987 includes Overseas and Army.
- Excluding those sent abroad via the private cable companies system.
- A station is a telephone provided for the use of a customer or renter.
- Excluding auto-manual and trunk exchanges.
- Inland telegram service ceased from 1 October 1982, 1983 figures are therefore not comparable with earlier years.
- Any enquiries should now be referred to: British Telecom plc, 81 Newgate Street, London EC1A 7AJ.

11 Distributive Trades, Research and Development

Annual retailing inquiries (Table 11.1)

The retailing inquiry covers businesses which operate in Great Britain and are engaged in retail distribution. It is undertaken on a sample basis from a register of businesses which the Business Statistics Office (BSO) maintains largely from information obtained by Customs and Excise in the administration of value added tax (VAT). The inquiry is addressed to businesses classified to the retail headings in the VAT trade classification (other than opticians) and also businesses outside retailing which are believed to undertake retailing activity. The inquiry does not cover those businesses that are not registered for VAT, nor those retailers who are registered but with a VAT turnover beneath the mandatory threshold for VAT registration.

The results of the 1982 and 1984 inquiries are presented using a 'kind of business' classification which is consistent with the Standard Industrial Classification 1980. However, for the 1984 inquiry three main changes have been made to the classification scheme at the detailed kind of business level, reflecting amendments made to improve the usefulness of the commodity list used in the inquiry. Under the revised scheme poulterers have been included with butchers rather than fishmongers. Similarly, retailers of domestic gas appliances have been classified with electrical and music goods retailers instead of with hardware, china and fancy goods retailers. Finally, cycle and perambulator retailers are no longer separately identified, with cycle retailers being included with toys, hobbies and sports goods retailers and perambulator retailers with furniture retailers. The 1982 figures in the table have been re-worked to reflect the above changes.

'Full' inquiries such as those for 1982 and 1984 collecting a broad range of information from a sample of 20 000 retail businesses now alternate with 'Slimline' inquiries addressed to 10 000 businesses. The first of these inquiries related to 1981, and they have been conducted subsequently for 1983 and 1985.

Retail trade: index numbers of value and volume (Table 11.2)

The retail sales index is based on monthly returns provided voluntarily by a panel of contributors. In its calculation, receipts under the National Health Service are excluded.

Full account has been taken of the results of the 1984 retailing inquiry, although 1980 has been retained as the reference year for the convenience of users. For further information, see *British Business*, 24 April 1987.

The series for 'All other non-food retailers' includes photographic goods retailers, florists, nurserymen and seedsmen, and other non-food retailers not elsewhere specified.

Motor Trades and Catering inquiries (Tables 11.3 and 11.4)

The motor trades and catering inquiries are conducted on a sample basis from the BSO's VAT-based register of businesses. In general the inquiries are addressed solely to businesses classified to these trades, in that businesses who may be engaged in the catering or motor trades as a subsidiary activity are excluded. (An exception is that the catering inquiry includes certain large groups of managed public houses owned by breweries.) The results generally relate to the total activity of all businesses registered for VAT, including those with a VAT turnover beneath the mandatory registration threshold.

Research and Development

Research and experimental development (R & D) in the United Kingdom is financed and carried out mainly by the Government, industry, universities and further education institutions, and various non-profit-making bodies. In 1985 £7.9 billion was spent on R & D (see *British Business*, 24 July 1987). Full-scale inquiries covering industrial R & D were held every third year until 1981; these have been superseded by a four-year cycle, with an intervening sample survey. The first of these sample inquiries was made to examine spending in 1983, and results appeared in *British business* on 18 January 1985. This showed expenditure of £6.6 billion in 1983. The inquiry for 1985

was on a full scale basis. There is an annual survey of government expenditure and employment on R & D.

In line with international recommendations, research and experimental development is defined for statistical purposes as 'creative work undertaken on a systematic basis in order to increase the stock of knowledge, including knowledge of man, culture and society, and the use of this stock of knowledge to devise new applications'.

Definitions of the sectors surveyed and notes on the survey procedures employed are given in an article which appeared in *Economic Trends* (HMSO) August 1985.

For the 1985 inquiry, industrial firms were asked to provide figures relating to the calendar year 1985, or the business year ending on a date between 6 April 1985 and 5 April 1986.

Returns from government departments relate to financial years ended 31 March. Further details of trends in Government R & D expenditure are given in the issue of *Economic Trends* for August 1986, and the *Annual Review of Government Funded R & D 1987*.

Table 11.5

This table covers R & D in the natural and medical sciences and engineering, and excludes research in the social sciences and humanities. The totals of both sections of the table are the amounts of R & D performed in the United Kingdom and exclude R & D performed abroad which is financed from within this country. No surveys of R & D performed by local authorities have been carried out since 1972, but estimates of local authorities' expenditure in these years have been included in the all-sector figures.

The figures of government financing of R & D as returned by the government and as returned by the sectors carrying out the work vary, largely because of differences in timing (see **Introduction** above).

Tables 11.6 and 11.7

Central government expenditure on R & D, including that of research councils, is surveyed annually and covers R & D in the social sciences as well as R & D in the natural sciences. The distinction between social science and other R & D has been retained in the accompanying tables, though it has been found difficult to make in practice. The borderline between research and other related activities, such as information services and general purpose data collection, is also difficult to define, especially for the social sciences. The figures for social science research are therefore considered to be less reliable than those for government R & D as a whole. The series which appeared in earlier editions of this publication has been amended by taking into account recently developed estimates for government expenditure on R & D in universities. These now include payments through the Treasury Grant for the research costs of postgraduate students, and also expenditure on research in the fields of the social services and humanities.

Table 11.6, as distinct from Table 11.7, includes money spent by the government to finance R & D work performed overseas. It shows the gross expenditure of government on R & D: 'gross' in that any receipts used to finance the expenditure are not deducted. Money spent on R & D work done by government itself (intra-mural expenditure) is distinguished from money passed to other sectors to fund R & D work (extra-mural expenditure). Table 11.6 shows natural and social science R & D separately, the former being analysed by functional groups of expenditure.

Table 11.7 relates to net government expenditure on R & D, that is, gross expenditure *less* receipts allocated directly towards financing the expenditure. The table shows total expenditure broken down according to the Statistical Office of the European Communities' revised objectives classification of budgeted expenditure on R & D.

Table 11.8

The trend in the 'volume' of R & D performed can be shown by means of estimates of expenditure at constant prices, using the most

Continued from page 213

appropriate price indices which can be prepared to revalue the current price figures. Work on constructing price indices specifically for R & D expenditure has been undertaken by the Department of Trade and Industry and by international organisations only in recent years. Table 11.8 shows figures for each of the industrial survey years from 1964 to 1983 at constant (1975) prices for total R & D in the natural sciences performed in the United Kingdom and the amounts performed by the government and industry, the latter being analysed by major product group. An article giving broad details of the method used in producing figures of R & D expenditure at constant prices was published in *Trade and Industry* (HMSO) on 6 April 1979.

Firms covered in the surveys were asked to provide figures for each product group in which they had incurred research and development expenditure. Product groups generally correspond quite closely to industry groups, since manufacturing industries are defined in terms of the products they make and a high proportion of the output of a particular product usually comes from a single industry group. Fuller details for 1981 are given in Business Monitor *MO14 Industrial Research and Development Expenditure and Employment 1981* (HMSO). Results for the 1975 and 1978 surveys are published in earlier Business Monitors with the same number and name apart from the reference year. The 1968 Standard Industrial Classification was used for these earlier inquiries.

Table 11.9

The table gives details of the 1981 and the 1983 surveys of industrial R & D, and uses the Standard Industrial Classification rebased on 1980.

12 External Trade

The tables covering external trade have been compiled from the annual and monthly *Overseas Trade Statistics of the United Kingdom* from 1976. United Kingdom is defined as Great Britain, Northern Ireland, the Isle of Man, the Channel Islands and the Continental Shelf (United Kingdom part). The grouping of the commodities, previously shown in the sections and divisions of the Standard International Trade Classification (Revised), is currently based on those of the SITC (Revision 2) or SITC (R2) which was introduced into the *Overseas Trade Statistics* from January 1978. The statistics in Table 12.1 are on a balance of payments basis; all other statistics in this section are on an *Overseas Trade Statistics* basis. For more detailed figures, notes and definitions relating to external trade, reference should be made to these volumes and also to the annual publication *United Kingdom Balance of Payments* (the CSO Pink Book) and *Monthly Digest of Statistics, Supplement of Definitions and Explanatory Notes*.

Changes in the coverage of the overseas trade statistics are made from time to time but as far as possible figures in these tables have been adjusted to the current basis. For latest data reference should be

made to the *Monthly Review of External Trade Statistics*, available from the Department of Trade and Industry.

The value of UK trade with selected areas, analysed by commodity divisions, is obtainable from the annual edition of the *Overseas Trade Statistics of the United Kingdom*.

Import penetration and export sales ratios (Table 12.2)

The ratios were first introduced in the August 1977 edition of *Economic Trends* in an article 'The Home and Export Performance of United Kingdom Industries'. The article described the conceptual and methodological problems involved in measuring such variables as import penetration. The industries are currently grouped according to the 1980 Standard Industrial Classification. The latest ratios for the full detail within manufacturing (over 200 activity headings) are shown in Business Monitor MQ12, 'Import Penetration and Export Sales Ratios for Manufacturing Industry'.

1. Statistics of visible trade on a balance of payments basis are obtained by making certain adjustments in respect of valuation and coverage to the statistics recorded in the *Overseas Trade Statistics*. These adjustments are described in detail in *United Kingdom Balance of Payments 1987 Edition* (HMSO).
2. Export unit value index as a percentage of the import unit value index.

13 Balance of Payments

Tables 13.1, 13.2 and 13.3 in this section are derived from *United Kingdom Balance of Payments 1987 Edition*—the CSO Pink Book and Tables 13.4 and 13.5 are based on the annual publication *British Aid Statistics*, the latest edition of which covers the period 1981 to 1985.

The following general notes and footnotes to the tables provide brief definitions and explanations of the figures and terms used. Further notes are included in the publications named above. As far as possible transactions have been included in the balance of payments at the rate of exchange at which the transactions took place.

CURRENT ACCOUNT

In principle, transactions are recorded when the ownership of goods or assets changes and when services are rendered.

Visible trade

The *Overseas Trade Statistics of the United Kingdom* are the basis of the balance of payments figures, with certain adjustments in respect of valuation and coverage.

Invisibles: Services

General government covers all UK government current expenditure and receipts not appropriate to other items in the current account.

Transport—sea transport covers both dry and wet cargo transactions of UK operators with overseas residents, and of overseas operators with UK residents. The figures relate to freight, charter hire, port disbursements and passage money.

Transport—civil aviation covers overseas transactions of British Airways and the British independent airlines, and the transactions of overseas airlines with UK residents. Figures relate to passenger fares, freight, charter hire and airport disbursements.

Travel covers personal expenditure by overseas residents in the United Kingdom and by UK residents in overseas countries.

Financial and other services comprises the earnings, net of expenses, of UK financial and allied institutions for services and all services transactions not included elsewhere.

Invisibles: Interest, profits and dividends

Includes all interest, profits and dividends accruing to UK residents from non-residents or payable overseas by UK residents (after deduction of local taxes and depreciation) and includes profits retained for re-investment.

Invisibles: Transfers

General government transfers includes principally grants to overseas countries and contributions and subscriptions to international organisations.

Private transfers. Value of private assets passing from non-resident to resident ownership or *vice versa* without a *quid pro quo* including transfers of assets by migrants other than their personal or household belongings.

TRANSACTIONS IN EXTERNAL ASSETS AND LIABILITIES

Outward and inward investment

Direct investment

Comprises mainly net investment by overseas companies in their United Kingdom affiliates, including the re-investment of retained profits, and by United Kingdom companies in their overseas branches, subsidiaries and associates. Government departments are excluded but outward investment includes a number of public corporations.

Also included are identified transactions in real estate and outward investment includes transactions in non-bank financial institutions' loans and mortgages.

Portfolio investment

United Kingdom portfolio investment overseas consists of net purchases and sales of overseas government, municipal and company securities.

Overseas investment in the United Kingdom comprises investment in:

UK company securities, representing the changes in the holdings by overseas residents of United Kingdom company securities, including securities issued abroad;

British government stocks, consisting of net transactions by overseas residents;

British government foreign currency notes and bonds; local authorities' securities and public sector net issues abroad.

Net foreign currency transactions of UK banks

This item consists of changes in deposits of foreign currencies made with UK resident banks by non-residents and loans by the banks in those currencies to non-residents.

It covers the financing of UK banks' net foreign currency business with UK residents *plus* any switching by the banks between foreign currencies and sterling.

Prior to 1979 data on foreign currency lending (apart from certain export credit) and borrowing are not available separately. Net transactions are shown under borrowing.

Net sterling transactions of UK banks

This item consists of sterling advances and overdrafts (net of repayments) provided to overseas residents (including banks abroad) by UK banks, sterling commercial bills discounted, acceptances, and sterling borrowing and deposit liabilities abroad.

Deposits with and lending to banks abroad by UK non-bank private sector

Consist of UK residents' deposits with banks in the Bank for International Settlements (BIS) reporting area *plus* assets held in the custody of banks in the United States of America.

Borrowing from banks abroad

Covers predominately borrowing from commercial banks in the BIS reporting area, the European Investment Bank and the United States Export-Import Bank.

Official reserves

Consists of the sterling equivalent, at current rates of exchange, of drawings on or additions to the gold, convertible currencies and special drawing rights held in the reserves and of changes in the reserve position with the International Monetary Fund (IMF).

Other external assets

Includes identified trade credit between unrelated companies (advance and progress payments on imports and until end-1982 export credit), inter-government loans by the United Kingdom and subscriptions to international lending bodies.

Other external liabilities

Includes identified trade credit between unrelated companies (advance on progress payments on exports and import credit), inter-government loans to the United Kingdom, transactions with the IMF and overseas holdings of Treasury bills.

Allocation of special drawing rights

The distribution of reserve assets created by the IMF.

Balancing item

Represents the net total of errors and omissions in other items.

Levels of UK external assets and liabilities

(Table 13.3)

The figures in this table show the levels of the stocks of external financial assets and liabilities at the end of each calendar year. Changes in these levels reflect not only the capital transactions during the year but also, in many instances, revaluations and other changes. In particular some items may be valued in foreign currency terms and most investments are recorded at either book or market values; in such instances revaluations will usually occur regardless of whether transactions take place.

Because of the very varied data sources used to derive the estimates there are many inconsistencies in the figures resulting particularly from different methods of valuation, which wherever possible, are at market value. Valuation problems, and the fact that certain assets and liabilities are unidentifiable, mean the balance between the estimates of external assets and liabilities is an inexact measure of the United Kingdom's debtor/creditor position with the rest of the world.

Assets include direct and portfolio investment overseas by UK residents, lending to overseas residents' by UK banks, deposits and lending overseas by other UK residents and the official reserves. Liabilities include overseas residents direct and portfolio investment in the United Kingdom, borrowing, etc. from overseas residents by UK banks and borrowing from overseas by other UK residents.

General government comprises UK central government and local authorities.

For a more detailed explanation and analysis of the figures see Section 9 of the 1987 Pink Book.

OVERSEAS AID

(Tables 13.4 and 13.5)

The United Kingdom aid programme is administered by the Overseas Development Administration (ODA) to promote the economic development of developing countries. It is managed within financial years, the money being voted annually by Parliament. However the statistics relating to the programme are published for the calendar year as this basis is used both for international aid comparisons and for

national purposes such as the balance of payments. Fluctuations may thus occur in the calendar year figures which are not reflected in the financial year figures. This has been particularly true in the case of India, the largest bilateral recipient, whose aid receipts in 1976, 1979 and 1981 were abnormally high, while its receipts in 1980 and 1982 were abnormally low.

Aid flows can be measured before (gross) or after (net) deduction of repayments of principal on past loans. These tables show only the gross figures.

Aid is provided in two main ways: *bilateral*, that is directly to governments of developing countries or to institutions in the United Kingdom for work on behalf of such countries, or *multilateral*, that is to international institutions for their economic development programmes. Table 13.4 shows the three main groups of multilateral agencies, the International Development Association being the largest in the World Bank Group.

Bilateral aid takes various forms. *Project aid* is finance for the establishment of new, or expansion of existing, production and infrastructure facilities. The bulk is provided by the ODA, either from country programmes or from the Aid and Trade Provision (a special allocation to soften the terms of credits to developing countries by mixing aid funds with private export credits). The Commonwealth Development Corporation invests in productive public or private sector projects in developing countries. *Non-project aid* includes programme aid (for import finance not related to specific projects), debt relief, budgetary aid, food aid and disaster relief. *Technical Co-operation* is used to provide experts to work overseas, training for developing country nationals, consultancies, small items of equipment, to fund research and development in the United Kingdom of benefit to developing countries and support to voluntary organisations. Most of the aid not allocable by country in Table 13.5 is for technical co-operation provided through organisations in the United Kingdom.

Fuller statistics of Britain's aid effort are published annually in *British Aid Statistics* (obtainable from the Library, ODA, Abercrombie House, East Kilbride, Glasgow G75 8EA). International comparisons are available in the OECD Development Assistance Committee's annual report. The latest is *1985 Report: Twenty-five years of development co-operation—a review* (available from HMSO).

14 National Income and Expenditure

The tables which follow are taken from those in *United Kingdom National Accounts 1987 Edition*, (the *CSO Blue Book*) published by Her Majesty's Stationery Office (September 1987). Some of the figures are provisional and may have to be revised later; this applies particularly to the figures for 1985 and 1986. The 1983 and earlier editions were called *National Income and Expenditure*.

From the 1987 edition, *The Blue Book* contains a brief introduction to the UK system of national accounts outlining some of the main concept and principles of measurement used. This shows how the aggregate figures describing the whole economy are related to one another and to figures in the sector accounts. A more detailed description of the statistics, together with a detailed description of the sources, methods and definitions used in making the estimates, is given in *United Kingdom National Accounts: Sources and Methods Third Edition* (HMSO 1985). Further information on the structure and inter-relationships of the tables in the national accounts is given in *The National Accounts—A short guide* (HMSO 1981).

In the tables in this section the analyses by industry are based, as far as possible, on the Standard Industrial Classification 1980.

The first aggregate measured in these tables is the **gross domestic product**. This is an estimate of the value of the goods and services produced by UK residents. Adding net property income from abroad to this aggregate produces the gross national product. The gross national product is not identical with the **national income**. The latter is defined as equal to the total of goods and services becoming available after deducting what is required to maintain real capital intact (the gross national product *less* capital consumption).

Gross national product (Table 14.1). The upper half of this table shows the various money flows which generate the gross domestic product and the gross national product. These include expenditure by UK final buyers—that is, expenditure on goods and services other than for use in current production and resale—and expenditure on British exports by overseas purchasers. The sum of these two items overstates the amount of income generated in the United Kingdom by the value of imports of goods and services; this item is therefore subtracted to produce gross domestic product at market prices. Deducting taxes on expenditure and adding subsidies produces the expenditure-based measure of the gross domestic product at factor cost, which is equivalent to the sum of the incomes of the factors of production before deduction of depreciation (capital consumption).

The lower half of the table shows the contribution to the gross national product of the different factors of production. The profit items in the table—income from self-employment, trading profits of companies, trading surpluses of public corporations and of other public enterprises—are shown before any deduction for depreciation and before providing for stock appreciation. (Stock appreciation is the change in value of stocks due to the change, if any, in the prices at which stocks are valued in the reckoning of profits.) This element of stock appreciation is deducted in reckoning the total of the gross national product.

Personal income and expenditure (Table 14.2). 'Persons' are here defined as including unincorporated businesses and private non-profit-making bodies serving persons. Income is shown gross before providing for depreciation or stock appreciation. Employers' national insurance contributions (but not the surcharge) are treated as employee income taxed at source and therefore appear under both income and expenditure. Personal income also includes employers' contributions to pension funds. Personal saving before providing for depreciation or stock appreciation is estimated as a residual and is subject to a wide margin of error.

Corporate sector appropriation account (Table 14.3). This table covers companies and public corporations. Trading profits earned in the United Kingdom are shown both before and after providing for stock appreciation but before deduction of depreciation allowances. Profits from operations outside the United Kingdom are included under income earned abroad. Dividends paid by one company to another are excluded both from dividends and from non-trading income.

Current account of general government (Table 14.4). This table is a consolidation of central government and local authorities' transactions on current account.

Summary capital account (Table 14.5). This table brings together the saving and investment of the several sectors of the economy and shows the total investment at home and overseas.

The index of output of the production industries (Table 14.6) (i.e. 'index of production'), which accounts for 36 per cent of the output measure of gross domestic product shown in the same table, provides a general measure of changes in the volume of industrial production in the United Kingdom. Production industries comprise Division 1, energy and water supply (coal mining, oil and gas extraction, production of other fuels and water) and Divisions 2 to 4, manufacturing. The index of output of the production and construction industries, which comprises production industries and construction, accounts for 42 per cent of gross domestic product. The indices are prepared by the Central Statistical Office in collaboration with the statistics divisions of government departments. The index of output of the production industries is published monthly approximately six weeks after the end of the month to which it applies but the index of output of the production and construction industries is published only quarterly and in arrears of the latest index data, when definitive construction output estimates have been made available by the Department of the Environment. The indices are calculated currently with 1980 as the base year, with the volume of production in other periods expressed as a percentage of either the average monthly production in 1980 for the index of output of the production industries or the average quarterly production in 1980 for the index of output of the production and construction industries. Annual series for broad industry groups from 1948, and quarterly series from 1952, are published in *Economic Trends Annual Supplement* (HMSO). More detailed series are available on request to the Central Statistical Office, Branch 4, Great George Street, London SW1P 3AQ. The monthly index of output of the production industries series and the quarterly index of output of the production and construction industries are published in the *Monthly Digest of Statistics* (HMSO).

The index of output of the production and construction industries is a weighted arithmetic average of 330 indicators, each representing the 'value added' by an individual industry or part of an industry as its contribution to total output of the United Kingdom. The weight given to each industry is proportional to its contribution to gross domestic product at factor cost in 1980; that is to say, the value the industry adds to its purchased materials, fuels and services. This is equal to the sum of income from employment *plus* profits after the deduction of stock appreciation. The weights are derived from the Annual Census of Production for that year, constrained to the aggregates shown in Table 3.1 of *National Income and Expenditure 1983 Edition* (HMSO). The weights shown in the table are those used in the compilation of the index from 1978 onwards. The 1980-based data were linked to the figures for earlier years on the basis of the annual figures for 1978 (see notes on rebasing below).

The gross output (that is, the total production) of an industry is the most frequently used proxy indicator for assessing change in value added, since the latter is difficult to measure in the short-term. In some cases the volume of production can be measured and such indicators make up about two-fifths of the index of production. About three-fifths of the index of production is derived from the volume of sales or deliveries or their value deflated by the relevant producer prices indices: however, since compilation of the 1980-based index of production, adjustments for changes to stocks and work done in the industries represented by these indicators are made at a more aggregate level. A very small proportion of the index of production is derived from work done or input of labour or materials indicators. For further notes on the general method of constructing the index see Industry Statistics: Occasional Paper No 18 *Series and weights used in the index of output of the production industries—1980 base* (CSO 1983), which is obtainable from the Central Statistical Office, Branch

3, Room 74B/3, Great George Street, London SW1P 3AQ, price £2.50 (cheques payable to *Cabinet Office*).

The index of production with the national accounts is rebased at approximately five-yearly intervals. Regular rebasing is required because the rate of growth in relative prices of net output of the various sectors may vary over time. In addition, the relative importance of each sector may change because of advances of technology, or variations in the pattern of demand for its goods. Index numbers for all years from 1978 were recalculated when the index was rebased on 1980 in Summer 1983. The index numbers from 1973 to 1978 (available on a 1975 = 100 basis and a different industrial classification, i.e. *Standard Industrial Classification Revised 1968*) were linked to the later figures by a simple rescaling of series approximating as closely as possible to series based on *Standard Industrial Classification Revised 1980*, using the two sets of index numbers for 1978. An article describing the effect of rebasing appeared in *Economic Trends* No 360 October 1983.

Industrial classification. The industrial analysis of the index of production is in conformity with the *Standard Industrial Classification Revised 1980* (HMSO) to which reference should be made for the details of the composition of each industrial group.

Market sector classification. These groupings combine the output of industries which meet broadly similar categories of demand: consumer goods, investment goods and intermediate goods (materials and fuels). Because the index of production measures the output of an industry and not of commodities, each market sector group will include some output from the other sector. The industrial composition of the market sectors is set out in *Industry Statistics: Occasional Paper No 21 Supplementary analyses of series used in the index of output of the production industries 1980 base* (CSO 1983) which is obtainable from the Central Statistical Office, price £2.50 (address shown above).

Gross domestic product by industry (Table 14.7). This table shows the contribution of each industry to the gross domestic product, measured as the sum of incomes, before providing for depreciation, arising in the industry. This is also equal to the 'value added' by the industry, that is, the excess of the value of its current output over the value of goods and services purchased from outside the industry and used in production.

Expenditure and output at constant prices (Tables 14.6, 14.8 and 14.9). These tables contain two virtually independent estimates of the gross domestic product of the United Kingdom at 1980 prices. The estimates in Table 14.6 are based on the index of industrial production and other statistics relating to the volume of output; those in Table 14.8 have been derived by revaluing estimates of final expenditure on goods and services at average 1980 prices. With full and accurate information the two methods would in theory lead to the same result. In practice, because there are numerous imperfections and gaps in the data, the two methods produce different results. For a general account of the methods of compiling the output index numbers, see *United Kingdom National Accounts: Sources and Methods Third Edition*. See also *Series and weights used in estimating the gross domestic product at constant factor cost, 1980 = 100*, *Industry Statistics: Occasional Paper No 20* (CSO 1984) for a list of series and weights currently used outside the production and construction industries, in compiling the

index numbers, which is obtainable from the Central Statistical Office, price £2.50 (address shown above).

In Table 14.9 each of the components of expenditure shown in Table 14.8 is expressed in index form, taking 1980 = 100.

Consumers' expenditure at current and constant prices (Table 14.10). Consumers' expenditure is a major component of final expenditure contributing to gross domestic product calculated by the expenditure method, at current prices (Table 14.1) and at constant prices (Table 14.8).

Consumers' expenditure consists of personal expenditure on goods and services for current use. It is now classified in two ways, first in certain commodity groups which are also available on a quarterly basis in the *Monthly Digest of Statistics* and secondly (in more detail) according to purpose. It includes the value of income-in-kind; imputed rent of owner-occupied dwellings; and final expenditure by private non-profit-making bodies serving persons. It excludes business expenditure allowed as deductions in computing income for tax purposes of both employed and self-employed persons.

It includes expenditure on durable goods, for instance motor cars, which from the point of view of the individual might more appropriately be treated as capital expenditure. The only exceptions are the purchase of land and dwellings and costs incurred in connection with the transfer of their ownership and expenditure on major improvements by occupiers, which are treated as personal capital expenditure.

The estimates of consumers' expenditure include purchases of second-hand as well as new goods, less the proceeds of sales of used goods.

Index numbers of gross domestic product and gross national disposable income (Table 14.13). This table brings together the various estimates of gross domestic product and the gross national disposable income at current and constant prices. They are shown in index number form based on 1980 = 100. The average estimates relate to the unweighted arithmetic average of the three estimates based on expenditure, income and output data.

Value of physical increase in stocks and work in progress (Table 14.14). This table gives a broad analysis by industry, and, for manufacturing industry, by asset, of the physical increase in stocks and work in progress. The physical increase at current prices equals the change in the book value of stocks less stock appreciation.

Gross domestic fixed capital formation (Table 14.15). Fixed capital formation comprises expenditure on the replacement of, and additions to, the stock of fixed capital assets located in the United Kingdom, including all ships and aircraft of UK ownership.

Gross capital stock (Table 14.16). The table shows estimates of the value of the reproducible capital assets (buildings, plant and machinery, vehicles, ships and aircraft) owned by various industry groups, without allowance for depreciation during the expended proportions of asset lives. The estimates are expressed at 1980 replacement cost. Leased assets are mainly included under 'distributive trades and other service industries' on the basis of ownership. A rough analysis of these assets, which still constitute only a small proportion of total gross capital stock, appears in *United Kingdom National Accounts 1987 Edition*.

- Figures for companies and public corporations are affected by privatisation. For further details see page 121.
- Before providing for depreciation, stock appreciation and additions to dividend, interest and tax reserves.
- Excluding financial transactions on writing-off debt. For details see footnote 3 to Table 6.4.

4. "Total capital transfers for the domestic sectors" equals capital transfers paid abroad.

5. Gross and net fixed capital formation by the personal sector excludes that by life assurance and pension funds: this is included with that of Other financial institutions—see footnote 3.

6. Gross domestic fixed capital formation by Other financial institutions, of which:

	1976	1977	1978	1979	1980	1981	1982	1983	1984	1985	1986
Life assurance and pension funds	922	842	1 097	1 124	1 735	1 822	1 899	1 368	1 385	1 292	1 203
Other	847	1 049	1 807	2 478	3 076	3 216	3 703	3 196	4 700	5 746	5 081

7. Equal to stock appreciation plus value of physical increase in stocks and work in progress.

8. Net investment abroad is equal, but opposite in sign, to the Overseas sector's financial surplus or deficit.

1. The weights are proportional to the distribution of net output in 1980 and are used to combine the indices from 1978 onwards. For the method of calculation in earlier years see paragraph 5.19 of *United Kingdom National Accounts: Sources and Methods, Third Edition, 1985*. The total of weights for all industries is 1000.

2. Comprising classes 92, 94, 96-99 and 00 of the Standard Industrial Classification Revised 1980.

1. For the years before 1978, totals differ from the sum of their components: see *United Kingdom National Accounts, Sources and Methods, Third Edition*, paras 3.58 to 3.61.

2. An analysis of general government consumption by function is given in table 9.3.

3. Excluding taxes on expenditure levied on imports.

4. Including taxes on expenditure levied on imports.

5. This represents taxes on expenditure less subsidies valued at constant rates.

6. This item is revalued here by the implied deflator for total imports of goods and services shown in table 1.7.

1. Differences between totals and the sum of constituent parts of manufacturing at 1980 prices for 1978 onwards and for all current prices are due to rounding. Differences between totals and components at 1980 prices before 1978 arise from the method of rebasing these years on to 1980 prices.

15 Personal Income, Expenditure and Wealth

Family Expenditure Survey (Tables 15.3 – 15.5)

The Family Expenditure Survey, introduced in 1957, covers all types of private households in the United Kingdom. It is a continuing enquiry in which a sample of about 11 000 addresses is selected annually, from which an effective sample of some 10 400 households is obtained, of which about 70 per cent co-operate. The main purpose of the survey is to provide a source of the weighting pattern of the Index of Retail Prices and so it is primarily concerned with household expenditure on a wide range of goods and services.

The income information the survey collects is basically to enable households to be classified into income groups and although most of the income information obtained is on a current basis, income from investment, self-employment and some other sources relate to a previous twelve-month period. As income and expenditure figures relate to different periods, the difference between expenditure and income as measured in the survey should not be regarded as savings or dis-savings.

Although the survey is primarily concerned with the expenditure of private households, much additional information is collected about the characteristics of each co-operating household. Consequently the survey provides a unique fund of important economic and social data.

Like all surveys based on a sample of the population, its results are subject to sampling error, and to some bias due to non-response. The sampling error is smallest in relation to the average expenditure of large groups of households or items purchased frequently when expenditure does not vary greatly between households. Conversely, it is largest in relation to small groups of households, and for items purchased infrequently for which expenditure varies considerably between households. However, comparison of the survey results over successive years justifies confidence in their reliability.

The results of the survey are published in an annual report, the latest being *Family Expenditure Survey 1985* (HMSO). This includes a list of the definitions used in the survey, items on which information is collected and a brief account of the field work procedure.

1. Original income is the total income in cash and kind of the household before the deduction of taxes or the addition of state benefits. The addition of cash benefits (retirement pensions, child benefit, etc.) and the deduction of income tax and employees' national insurance contributions give disposable income. By further allowing for taxes paid on goods and services purchased (such as VAT) and benefits in kind received from public expenditure (housing subsidies, education, health, etc.) an estimate of 'final' income is derived.

2. These income figures are derived from estimates made by the Central Statistical Office, based largely on information from the Family Expenditure

Survey, and published each year in *Economic Trends*. As a result of changes in the coverage of taxes and benefits and the method of allocating them to households, these figures are not exactly comparable from year to year.

3. A pensioner household is one in which the head is over state retirement pension age and when more than three quarters of the household's income consists of national insurance retirement and similar state pensions, or related supplementary benefit.

4. Due to the smaller sample size of this household type, the figures may be subject to greater than average year to year variation.

- The distributions cover only incomes as computed for tax purposes and above a level which for each year corresponds approximately to the single person's allowance. Incomes below these levels are not shown because the information about them is incomplete.
- The reporting of investment income in the Survey is incomplete; investment income from which basic rate tax has been deducted at source and upon which there is no higher rate liability, investment income surcharge or restricting age allowance is under-recorded. This is because this type of investment income has no operational significance as all liability to tax has been satisfied.
- All figures have been independently rounded.
- Where relief at basic rate is given at source, eg under the MIRAS scheme, income tax is calculated without any deduction for such relief (but after allowance for any basic rate relief due at higher rates). The provision of basic rate relief at source on most mortgage interest from 1983-84 thus produces higher estimates of tax due than in previous years.

1. Information derived from the Family Expenditure Survey.

2. In 1979 and 1983 data were not collected for a few weeks at the time of the General Elections.

3. From 1984 figures for household income are on a revised basis: see *Family Expenditure Survey Reports* for 1983 and 1984 for details.

4. Imputed income is the weekly equivalent of the rateable value: this is adjusted to allow for general increases in rents since date of valuation, and is also included in income of households living rent-free. From 1976 the method of calculating this adjustment is changed. 1985 assessments of rateable values in Scotland were used from 1 April 1985 in the calculation of imputed income and housing expenditure of owner-occupiers and those living rent-free (1985 definitions 14(h), (g)).

5. From 1982 'Other sources' includes very small amounts of income previously classified under self-employment.

- Information derived from the Family Expenditure Survey.
- In 1979 and 1983 data were not collected for a few weeks at the time of the General Elections.
- Adults and children are:
Adults = all persons 18 and over and married persons under 18
Children = all unmarried persons under 18.
- From 1982, figures for persons working (and persons not working) are on a revised basis: see *Family Expenditure Survey Report* for 1982 for details.
- Excludes mortgage payments but includes imputed expenditure from owner-occupancy and from rent-free occupancy. Imputed expenditure is the weekly equivalent of the rateable value which is adjusted to allow for general increase

- in rents since date of valuation. From 1976 the method of calculating this adjustment is changed. Arising from the introduction of the Housing Benefit Scheme, figures for expenditure on housing are on a revised basis for 1984. For 1983 figures represent, as far as possible, a continuous series with earlier years: see *Family Expenditure Survey Reports* for 1983 and 1984 for details. 1985 assessments of rateable values in Scotland were used from 1 April 1985 in the calculation of imputed income and housing expenditure of owner-occupiers and those living rent-free (1985 definition 14(h), (g)).
- Miscellaneous expenditure was greater before 1980 when changes in classifying credit card expenditure were introduced.

Source Department of Employment

Public sector

In Table 16.1 the term public sector describes the consolidation of central government, local authorities and public corporations. The table sets out the relationship between the public sector financial deficit and the public sector borrowing requirement, (PSBR). A financial deficit (or surplus) represents the extent to which a sector's gross savings—that is, the balance of receipts and expenditure on current transactions—*plus* net capital transfers are insufficient (or more than sufficient) to finance the sector's expenditure on physical assets.

In recent years the public sector has been in deficit and has had to borrow. The deficit is not a complete indication of the borrowing requirement because it does not take into account lending to the private sector and overseas and other non-borrowing financial transactions. The borrowing requirement equals the financial deficit *plus* the net increase in these financial assets. Net increase in bank deposits and other liquid assets, however, is counted as an offset to borrowing.

Details of public sector borrowing and the contributions to the PSBR are given in Table 16.2. Generally net acquisition of public sector debt and lending within the public sector is counted as an offset to borrowing so that the PSBR represents the net requirement for finance from the private sector and overseas. But the central government borrowing requirement is counted as covering direct on-lending by central government to local authorities and public corporations. Their additional 'contributions' to the PSBR are therefore equal to their borrowing requirements *less* their direct borrowing from central government.

General government borrowing requirement is the sum of the borrowing requirements of central government and local authorities *less* direct borrowing by local authorities from central government. The public sector borrowing requirement is the general government borrowing requirement *plus* public corporations borrowing requirement *less* public corporations direct borrowing from central government.

The borrowing requirements are measured from the financing items rather than as the difference between receipts and payments because financing information is available sooner and, for local authorities and public corporations, is probably more reliable.

Central government

The central government embraces all bodies for whose activities a Minister of the Crown, or other responsible person, is accountable to Parliament. It includes, in addition to the ordinary government departments, a number of bodies administering public policy but without the substantial degree of financial independence which characterises the public corporations; it also includes certain extra-budgetary funds and accounts controlled by departments.

The government's financial transactions are handled through a number of statutory funds, or accounts. The most important of these is the Consolidated Fund which is the government's main account with the Bank of England. Up to 31 March 1968 the Consolidated Fund was virtually synonymous with the term 'Exchequer' which was then the Government's central cash account. From 1 April 1968 the National Loans Fund, with a separate account at the Bank of England, was set up by the National Loans Act, 1968. The general effect of this Act was to remove from the Consolidated Fund most of the Government's domestic lending and the whole of the Government's borrowing transactions and to provide for them to be brought to account in the National Loans Fund.

Revenue from taxation and miscellaneous receipts, including interest and dividends on loans made from Votes, continue to be paid into the Consolidated Fund. After meeting the ordinary expenditure on Supply Services and the Consolidated Fund Standing Services, the surplus or deficit on the Consolidated Fund (Table 16.4), is payable into or met by the National Loans Fund.

Table 16.4 also provides a summary of the transactions of the National Loans Fund. The service of the National Debt, previously borne on the Consolidated Fund, is now met from the National Loans Fund which receives (a) interest payable on loans to the nationalised industries, local authorities and other bodies, whether the loans were made before or after 1 April 1968 and (b) the profits of the Issue Department of the Bank of England, mainly derived from interest on government securities, which were formerly paid into the Exchange Equalisation Account. The net cost of servicing the National Debt after applying these interest receipts and similar items is a charge on the Consolidated Fund as part of the standing services. Details of National Loans Fund loans outstanding are shown in Table 16.7.

Details of borrowing and repayments of debt, other than loans from the National Loans Fund, are shown in Table 16.6.

Foreign currency debt as a percentage of debt held outside public sector	10.0	11.9	11.2	9.3	7.4	5.5	5.0	5.3	5.0	4.7	4.9

1. An article describing these statistics was published in *Economic Trends* No. 283, May 1977.

2. Comprises the total liabilities of the National Loans Fund, full details of which are given in Section 3 of *Consolidated Fund and National Loans Fund; Supplementary Statements* each year.

3. Total foreign currency debt for each sub-sector is valued at middle closing spot exchange rates on the last working day of March of each year. Much of the foreign currency debt of local authorities and public corporations has been contracted through the exchange cover scheme under which the Treasury guarantees the debt against depreciation of sterling *vis-a-vis* the currency in which the debt is denominated. Thus the market exchange rate valuation used will overstate the liability of these authorities when sterling depreciates, but not the liability of the public sector as a whole.

4. Including sterling stocks of nationalised industries guaranteed by the British government.

5. Official holdings at 31 March 1986 were made up as follows: Treasury bills—£844 million, marketable securities—£8 671 million, ways and means advances—£3 441 million, other (longstanding) debt to the Bank of England Issue Department—£11 million, and non-marketable stocks issued to the National Debt Commissioners—£506 million.

6. From November 1979 Trustee savings banks' ordinary department and new department were amalgamated. The deposit liabilities of the former are now shown as a diminishing claim on the fund for banks for savings.

7. Includes accrued interest, index-linking and bonus as applicable on national savings certificates and SAYE contracts and, from 1981, National Savings Bank investment accounts.

8. Excluding notes and coin held by the Bank of England.

9. For details see Section 4 of *Consolidated Fund and National Loans Fund; Supplementary Statements* for each year.

10. The nominal amount outstanding. The Consolidated Fund's actual liability to the Post Office Superannuation Fund has been up to 1982 to make quarterly payments partly to meet interest at 2½ per cent on the nominal debt and partly to reduce it in the form of a holding of consols. The amount of this nominal reduction therefore depended upon the price of consols at the time of payment.

11. These stocks are liabilities of public corporations but cannot be distinguished from British government securities in the sector analysis of holdings.

12. Holdings by the domestic private sector are obtained as a residual and may contain some unidentified holdings by public sector bodies.

13. Where data are readily available and other than guarantees of loans to the public sector. Further details are given in *Consolidated Fund and National Loans Fund Accounts: Supplementary Statements* for each year.

1. Actual receipts in the year are shown gross, and payments of refunds and premiums are included in expenditure on supply services, national insurance surcharge from April 1977.

2. Payment to National Loans Fund representing its payments for the service of the National Debt less its receipts of interest on loans outstanding, etc.

3. Includes net issues to Contingences Fund.

4. Minus sign indicates a net issue.

5. See Table 16.6.

Bank deposits											

1. This is equal to National Loans Fund borrowing and special transactions (net) less receipts from other central government funds, etc.

2. A negative item represents a surplus, a positive item a deficit.

3. Excluding bills held as the sterling counterpart of assistance from overseas central banks, which are part of Overseas official financing.

4. Includes tax reserve certificates, tax deposit accounts, and certificates of tax deposit from October 1975.

5. Excluding foreign currency borrowed under the exchange cover scheme which is included in Overseas official financing: net official financing.

6. Excluding net drawings from the International Monetary Fund and the sterling equivalent of foreign currency deposits by overseas central banks which are part of Overseas official financing.

7. Market transactions by the Issue department, Bank of England and by the National Debt Commissioners.

1. Excludes Ulster Savings Certificates.
2. Investment Account contributes to the funding of PSBR/CGBR from January 1981.
3. From 21 November 1976 Trustee Savings Banks' Current accounts formerly included in the Ordinary departments' totals and the Special investment department were amalgamated to form the New department. From 21 November 1979 the Ordinary and New departments of the Trustee Savings Banks amalgamated and will no longer be part of National Savings.
4. Including National Savings stamps and gift tokens and securities on the National Savings register, which (except for National development bonds and British savings bonds) do not appear in the first part of the table.

5. Including accrued interest to date.
6. Nominal value held in National Savings section.
7. From September 1979 excludes £7.7 million deemed to be outstanding National Savings stamps written off on 15 August 1979.
8. In 1976/77 includes £1.0 million transferred from Greenock Provident TSB and £2.8 million transferred from Birmingham Municipal TSB.
9. Nominal value held (until 1979) in Trustee Savings Banks section.

- The married man's allowance is that for a full year. In the year of marriage the allowance is reduced by one twelfth of the difference between the married and single personal allowances for each complete month (beginning on the sixth day of each calendar month) prior to the date of marriage.
- The wife's earned income allowance has as its maximum value the amount shown. Where the earned income is less, the allowance is reduced to the actual amount of earned income.
- The age allowance. It replaces the single or married allowances, provided the taxpayer's income is below the limit shown. For incomes in excess of the limit, the allowance is reduced by £2 for each additional £3 of income until the ordinary single or married allowance is reached.
- The child allowance depends upon the age of the child at the start of the tax year (6 April). Where the child's income exceeds the limit shown, the child allowance is reduced by the excess. For unmarried children under 18, there is a further limit of £115 investment income. From 1978–79, special rules apply in respect of certain students and certain children resident overseas. All child allowances were discontinued from 1982–83.
- The family allowance deduction was a reduction in personal allowances for each child for whom a family allowance was received. Where the family allowance was payable for only part of the year, the family allowance deduction was reduced accordingly.
- The additional personal allowance may be claimed by a single parent (or by a married man if his wife is totally incapacitated) who maintains a resident child at his or her own expense.

- Widow's bereavement allowance is due to a widow in the year of her husband's death and in the following year provided the widow has not remarried before the beginning of that year.
- The dependent relative allowance is due to a taxpayer who maintains, wholly or partially, either (a) an aged or infirm relative, or (b) his or his wife's separated, divorced or widowed mother. The relative's income must be below the limits shown in order for the full allowance to be given (the limit is equal to the basic National Insurance Retirement Pension). The allowance is reduced by the excess of the relative's income over the income limit.
- The daughter's or son's services allowance may be claimed by an aged or infirm taxpayer who maintains a daughter or son (before 1978–79 a daughter only) on whose services the taxpayer or his wife are dependent.
- The housekeeper allowance may be claimed by a widow or widower who has a resident housekeeper (before 1978–79 a female housekeeper only). For 1978–79 and earlier years this allowance could also have been claimed by an unmarried person who maintained a resident relative (before 1978–79 a female relative only) to look after a brother or sister for whom child allowance was given.
- The blind person's allowance is due to a registered blind taxpayer and up to 1980/81 was reduced by the amount of any tax-free blindness disability pension which was receivable.
- From 1979–80 relief on life assurance premiums is given by deduction from the premium payable.
- From 1984–85 life assurance relief is confined to policies made before 14 March, 1984.

1. The sums shown exclude inter-authority loans and debt transfers, and temporary loans and overdrafts obtained for the purpose of providing for current expenses. No deduction has been made in respect of sums held in sinking funds for the repayment of debt.

2. At 15 May for Scotland up to 1975.

3. The Northern Ireland Loans Fund was abolished on 1 April 1983 and its functions transferred to the Northern Ireland Consolidated Fund.

4. Provisional.

1. Gross expenditure less inter-authority and inter-account transfers.

2. Including rate fund support for transport (LA and non-LA).

3. Burial grounds and Crematoria were treated as trading services for 1976/77 and 1977/78, and were included amongst 'Other trading services'. In 1975/76, 1978/79, 1979/80 and 1980/81 they were included amongst 'Environmental services'. From 1981/82 they were included amongst 'Other services'.

4. Rate fund contributions to Housing and Trading Services (excluding transport) and public water requisitions.

5. Expenditure out of loans, government grants and other capital receipts.

6. Provisional.

17 Banking, Insurance, etc.

Public sector borrowing requirement

Table 17.7

Net non-deposit sterling liabilities

This comprises changes in the sterling component of capital and internal funds and reserves of all monetary sector institutions, *less* their sterling investments in UK banks and other non-financial sterling assets, together with residual errors arising from the exclusion of sterling transactions between institutions within the sector. This item replaces 'Net non-deposit liabilities' which comprised changes in both sterling and foreign currency items. Total net non-deposit liabilities (in sterling and foreign currency) are shown in Table 17.4.

External and foreign currency counterparts

This now includes changes in the foreign currency component of capital, internal funds and reserves of all monetary sector institutions, *less* their foreign currency investments in UK banks and other non-financial assets in currencies other than sterling: these items were formerly included in 'Net non-deposit liabilities'. Changes in these items are calculated in transactions terms, that is after an adjustment has been made for the estimated effect of changes in the sterling value of foreign currencies.

1. Including the historic liability of the Treasury of £11 million.
2. The only liability not shown separately is the Bank's capital (held by the Treasury) which has been constant at £14.6 million.
3. Excluding local authorities' and public corporations' deposits, which are included under Reserves and other accounts.
4. Deposits called from institutions are not at their free disposal. Until 19 August 1981, all banks and finance houses which observed the common reserve ratio were liable for calls to lodge special deposits. With effect from 20 August 1981 only reporting institutions with eligible liabilities of £10 million or more

are liable for special deposit calls. This item also includes deposits under the supplementary special deposits scheme which was in force on three occasions before 1980.

5. Up to 19 August 1981 these constituted the current accounts held at the Bank by the banks and discount houses. From the introduction of new arrangements for monetary control on 20 August, they consist of operational deposits held mainly by the clearing banks and non-operational cash ratio deposits for which recognised banks and licensed deposit takers are liable.

1. At end-1981, in the quarterly series, the old banking sector was replaced by the new monetary sector. The UK monetary sector comprises the UK offices of institutions either recognised as banks or licensed to take deposits under the Banking Act 1979, together with the National Girobank, the Banking Department of the Bank of England, and those institutions (including branches of mainland banks) in the Channel Islands and the Isle of Man which have opted to participate in the new monetary control arrangements introduced in August 1981. Inter-bank items are excluded and adjustments made to allow for transit items. Figures for other currencies are affected by changes in exchange rates.

2. During 1975 changes in statistical reporting and the number of contributors added about £400 million.
 3. The introduction of the new monetary sector at end-1981 added about £9 850 to total assets and liabilities.
 4. Before the introduction of new statistical returns during 1975 all UK residents' deposits in foreign currency were allocated to the private sector.

1. From 1981 this table relates to the business of the United Kingdom offices of those members of the monetary sector which report on a monthly basis, other than members of the London Discount Market Association (LDMA), the Trustee savings banks and the Banking Department of the Bank of England. For a description of the background of these changes see the December 1981 *Bank of England Quarterly Bulletin*, page 531.

2. From 1983, the Trustee savings banks and the Banking Department of the Bank of England are included.
 3. From 1983, market loans to UK public corporations and the UK private sector are included as advances.

1. This is a series of statistics based on the Standard Industrial Classification 1980 and comprises loans, advances and acceptances by all monthly reporting institutions other than members of the London Discount Market Association (LDMA). The table includes lending under the Department of Trade and Industry special scheme for domestic shipbuilding, secured money placed with money brokers and gilt-edged jobbers, time deposits placed with and certificates of deposit issued by building societies.

2. From end November 1986 lending to securities dealers, stock brokers and stock jobbers (including money placed with the stock exchange money brokers and gilt-edged market makers) is shown separately within the Financial sector. Such lending was previously included in the Other services line of Business and other services.

3. Now published as Home Purchase.

1. Between 1975 and November 1981 these figures include the members of the London Discount Market Association (LDMA), two discount brokers (who became members of the LDMA in 1980) and the money trading departments of five banks carrying on an essentially similar type of business. Since November 1981 this group has again comprised members of the LDMA.
2. Securities, etc., are generally reported at the value standing in the reporting institution's books.

3. Including local authority and public corporation bills.
4. Including funds lent to the United Kingdom monetary sector and in the local authority market.
5. Excluding capital and reserves.

1. The stock figures for end-1981 are on the basis of the new monetary sector; changes during the years, up to and including 1981, are on the basis of the old banking sector.

2. The estimates of levels of coin in circulation include allowance for wastage, hoarding, etc.

3. Deposits are confined to those with institutions included in the United Kingdom monetary sector (see table 17.3).

Source Bank of England

4. After deducting 60 per cent of transit items.

5. Including UK residents' holdings of certificates of deposit.

6. The figures include changes in the sterling value of the deposits caused by changes in exchange rates.

7. As far as possible the changes exclude the effect of changes in the number of contributors to the series, and also of the introduction of new statistical returns in 1975.

- Each bank has a single base rate, which may sometimes differ from those of other banks. The rates of interest charged by the London clearing banks for their advances to customers and their discounting of trade bills are, in general, linked to their own individually declared base rates. The rates charged for advances depend on the nature and status of the customer; most lending is between 1 per cent and 5 per cent higher than base rate. Some lending is related to market rates instead of base rates.
Between 11 September 1973 and 28 February 1975 the banks were not allowed to pay more than 9½ per cent on deposits under £10 000.
Since February 1975 the margin between base rate and that on deposit accounts has fluctuated between 2 per cent and 4½ per cent.
- Weighted averages of discount rates at the weekly allotments of 91 day bills.
- The mean of the discount market's buying rates (discount rates per cent per annum). Averages of working days.
- Figures are averages of working days.
- The mean of the lowest bid and highest offer rates over the day. The yield on a three-month sterling certificate of deposit is usually close to that for a three-months inter-bank deposit.
- For a minimum term of three months and thereafter at seven days notice. The mean of the daily range. From June 1982 the rates are for 10.30 a.m.

1. Gross redemption yields derived from yield-maturity curves fitted mathematically. The figures are averages of Wednesday yields until 1979. From 1980 the average is of all observations (usually 3 per week); from January 1982 figures are the average of working days. The method of calculation is described in the *Bank of England Quarterly Bulletin*, December 1972, September 1973, June 1976 and June 1982.

2. Averages of working days, based, up to and including March 1982, on the mean of the middle opening and middle closing prices each day; thereafter the figures are based on closing prices only. Gross accrued interest is excluded; tax is ignored.

3. The series are arithmetic averages of daily figures from the *Financial Times*—Actuaries share indices. Price indices (using weighted arithmetic averages) are based on 10 April 1962 = 100.

4. Up to and including 1980, series are based on 15 redeemable debentures, weighted to give average term to maturity of 20 years. The yields used are redemption yields. The *Financial Times* published a new rebased series of debenture and preference share indices from 17 March 1981. The series from 1981 relate to the price index and redemption yield on 25 year stocks.

5. Based on 500 shares.

Footnotes to table 17.12 on page 290.

1. The estimates relate to new money raised on the main stock market by issues of ordinary, preference and loan capital (public issues, offers for sale, issues by tender, placings, and issues to shareholders and employees) by listed public companies and local authorities in the United Kingdom; and by overseas borrowers split between central government, state and local governments and companies. The estimates include UK local authority negotiable bonds (of not less than one year) issues to or through the agency of banks, discount houses, issuing houses or brokers. Mortgages, bank advances and any other loans redeemable in less than twelve months are excluded; so also are loans from UK government funds (including the former Industrial Reorganisation Corporation and the National Enterprise Board) but not government subscriptions to company issues made *pari passu* with the market. Issues to shareholders are included only if the sole or principal share register is maintained in the United Kingdom. Estimates of issues are based on the prices at which securities are offered to the market. Subscriptions are recorded under the periods in which they are due to be paid. Redemptions relate to fixed interest securities of the kinds included as issues; conversion issues in lieu of cash repayment are included in the gross figures of both issues and redemptions. These figures include issues of debentures and loan stock carrying the right of conversion into, or subscription to, equity capital. Estimates for these issues less redemptions are: 1977 –5; 1978 –21; 1979 23; 1980 178; 1981 194; 1982 8; 1983 47; 1984 101; 1985 320.

The division between United Kingdom and overseas company borrowers is determined by the location of the registered office. The industrial classification of companies is according to the primary occupation of the borrowing company or group and is based up to 1982 on the former Standard Industrial Classification 1968 and from 1983 on the Revised Standard Industrial Classification 1980.

2. The estimates exclude issues on the unlisted securities market which was launched by the Stock Exchange in November 1980. These issues are mainly of ordinary shares by industrial and commercial companies. Estimates of new money raised are 1980 88; 1981 54; 1982 87; 1983 163; 1984 159; 1985 180.
3. The figures for 1978 and 1979 include £449 m. and £149 m. respectively for rights issues by BL Ltd. Over 99 per cent of both issues was taken up by the National Enterprise Board. However, the figures for 1980 exclude £375 m. issued by BL Ltd to the Government via the National Enterprise Board.
4. Overseas companies including public corporations.
5. Prior to the introduction of the Monetary sector in November 1981 statistics relate to issues by the banking sector.
6. 'Other' includes special finance agencies (listed public companies engaged in the provision of medium and long-term finance to industry e.g. ICFC) and those finance houses and other consumer credit grantors not covered by the Monetary sector.

1. The figures for each year relate to accounting years ending on dates between 1 February of that year and 31 January of the following year.

2. Includes 3 Northern Ireland societies, responsibility for which was acquired under the Building Societies Act 1986.

3. Includes amounts recoverable from HM Government under Option Mortgage Scheme and MIRAS (Mortgage interest relief at source).

4. Based on the mean of the amounts outstanding at the end of the previous and the current year.

Source Registry of Friendly Societies

Footnotes to table 17.14 on page 292.

1. There are breaks in the series between 1985 and 1986 where indicated. Up to 1985 credit advanced excluded running-account and block discounted agreements by finance houses and other specialist credit grantors, and amounts outstanding excluded block discounted agreements outstanding to finance houses and other specialist credit grantors.
2. A high proportion of credit advanced in certain types of agreement, notably on bank credit cards and by mail order houses, is repaid within a month, reflecting the use of such agreements as a method of payment rather than as a means of obtaining credit.
3. Finance houses, check traders, money lenders and pawnbrokers.

4. Up to 1985 agreements with consumers are credit agreements regulated under the Consumer Credit Act 1974 and agreements with businesses are those agreements not regulated under the Consumer Credit Act 1974.
5. Clothing retailers, household goods retailers, mixed business retailers (other than co-operative societies) and general mail order houses.
6. Seasonally adjusted.

1. Many companies included in these statistics became part of the new monetary sector at end-1981. See table 17.3. The new coverage excludes such companies, with the 1981 figures showing the position immediately after the transfer.

Source Department of Trade and Industry

2. Data up to end-1981 were collected on a different return and in some cases have been estimated.

3. Prior to 1986, amounts outstanding on finance leases are included with real assets for leasing, hiring or renting out.

4. Net of unearned credit charges.

Note: Assets are shown as being positive; liabilities as being negative.

1. Investments are at market value.

2. From end-1979 revised reporting forms for investment trust companies and for unit trusts, giving additional information, were introduced and their reported figures have been grossed up to cover non-contributors to the series. Also from end-1979 annual balance sheet returns were introduced for property unit trusts.

1. These figures cover funded schemes only and therefore exclude the main superannuation arrangements in the central government sector.
2. Prior to 1978 no adjustment has been made for funds representing some 42 per cent (other public sector) of total assets which have an accounting year other than end-December (usually end-March).
3. Funds where the parent has been privatised are included in the private sector from the year in which privatisation took place if that occurred by the end of September, or from the following year if privatisation was in October or later.

4. From 1982 including UK public corporation securities.
5. Other assets are included with UK land, property and ground rent prior to 1978.
6. Including overseas land and property.
7. Liabilities are shown negative.

1. These societies are registered under the Industrial and Provident Societies Acts and are included in Table 17.19. See also footnote 1 to that table.
 2. Co-operative Wholesale Society Ltd., Scottish Co-operative Society Ltd., and Co-operative Tea Society Ltd. During 1973 the businesses of the last two mentioned societies were transferred to the Co-operative Wholesale Society Ltd. Only in respect of the Scottish Co-operative Society Ltd. has the registry been cancelled.

3. These figures include the sale of goods purchased from the wholesale societies which are also included in the sales of those societies in this table.
 4. Including net balance disposable and reserves but excluding loans from non-members.

1. A merger (which takes place when two companies combine to form a new company) is reckoned as the acquisition of the smaller company by the larger and is valued at the market value of the smaller company's share in the newly formed company.

2. The headings relate to the 1983 and later figures which are based on the 1980 Standard Industrial Classification. There are changes in coverage in nearly all headings. The major ones being the transfer of:

- man-made fibres from textiles to chemicals
- office machinery from mechanical to electrical engineering
- marine engineering from shipbuilding to mechanical engineering
- mineral and ore extraction from energy to form a new heading
- coal and petroleum products, nuclear fuel from chemicals to energy
- distribution of motor vehicles and parts, retail distribution of petroleum products and repair of motor vehicles from services to wholesaling and retailing (repairs with retailing)
- estate agents from real estate to services
- hotels and catering from services to form a new heading
- mixed activities have been split between manufacturing and non-manufacturing
- the definition of total manufacturing in 1983 and in subsequent years is not comparable with earlier years

3. Not applicable for 1983 and onwards.

Note: The figures are based on an analysis of company accounts and full details are given in Business Monitor MA3 Company finance (HMSO).

1. Listed and unlisted limited companies registered in Great Britain excluding companies whose main activity is insurance, banking or finance. From 1977 to 1981, figures are based on a sample of 1 000 or fewer companies with capital employed of £4.16 million in the current year. From 1982, figures are based on a panel initially of 2 000 companies, with capital employed of £2.9 million or more in 1981.
2. There may be a slight discrepancy between a total and the sum of its constituent items due to rounding.
3. The figures for a particular year relate to companies' accounting years ending between 1 April of the year shown and 31 March of the following year. 75 per cent of the larger companies have accounting periods ending in the fourth quarter of the calendar year or in the first quarter of the following year.
4. Provisional.
5. Loans, other than bank loans, which are wholly repayable within five years.
6. Includes all corporation tax, irrespective of the date on which it is payable, but is net of advance corporation tax recoverable.

7. Includes tax equalisation reserve and amounts charged to deferred tax for such things as capital gains tax and betterment levy.
8. Loans, other than bank loans, which are not wholly repayable within five years.
9. Relates to the position after charging directors' fees and emoluments, pensions to past directors, superannuation payments, compensation for loss of office, auditors' fees and any exceptional expenditure (e.g. on reorganisation or closure) but excluding any profit or loss on disposal of assets and before allowing for depreciation provisions, all interest on loans, and hire charges for plant and machinery.
10. Defined for the purpose of this analysis, as shareholders' interest (issued share capital and reserves), minority shareholders' interest, deferred taxation, long-term loans (including debentures and mortgages)—i.e. all the items which finance net assets—plus bank loans and overdrafts, short-term loans and indebtedness to directors and group members, less amounts due from group members.
11. Excludes VAT but includes excise duties.

1. In Scotland private trust deeds are not registered with the Accountant and particulars of them are not available. The only deeds of arrangement with creditors registered are those terminating sequestrations.

2. Sequestrations awarded but not brought into operation are excluded from these figures.

3. 92 sequestrations under The Bankruptcy (Scotland) Act 1913 and 347 sequestrations under The Bankruptcy (Scotland) Act 1985.

18 Prices

Producer price index numbers (Table 18.1 – 18.4)

The producer price indices were published for the first time in August 1983, replacing the former wholesale price indices. Full details of the differences between the two indices were given in an article published in *British business*, 15 April 1983.

The producer price indices are calculated using the same general methodology as that used by the wholesale price indices. A comprehensive guide to the collection and calculation of the wholesale price indices entitled *Wholesale price index: principles and procedures* is published by the Government Statistical Service and is available from HMSO, price £5.60.

The index numbers in Tables 18.1 and 18.2 are constructed on a net sector basis. That is to say, they are intended to measure only transactions between the sector concerned and other sectors: within sector transactions are excluded. Index numbers for the whole of manufacturing are thus not weighted averages of sector index numbers.

All the index numbers are compiled exclusive of value-added tax. Revenue duties on cigarettes, manufactured tobacco and alcoholic liquor are included as is the duty on hydrocarbon oils.

The indices relate to the average prices for a year.

Purchasing power of the pound (Table 18.5)

Changes in the internal purchasing power of a currency may be defined as the 'inverse' of changes in the levels of prices; when prices go up, the amount which can be purchased with a given sum of money goes down. Movements in the internal purchasing power of the pound are based on the consumers' expenditure deflator (CED) prior to 1962 and on the General index of retail prices (RPI) from January 1962 onwards. The CED shows the movement in prices implied by the national accounts estimates of consumers' expenditure valued at current and at constant prices, whilst the RPI is constructed directly by weighting together monthly movements in prices according to a given pattern of household expenditure derived from the Family Expenditure Survey. If the purchasing power of the pound is taken to be 100p in a particular month (quarter, year), the comparable purchasing power in a subsequent month (quarter, year) is

$100 \times \frac{\text{earlier period price index}}{\text{later period price index}}$, where the price index used is the CED for years 1946–1961 and the RPI for periods after 1961.

A long series on the purchasing power of the pound back to 1914, the latest information and a detailed explanation of the estimation of changes in the purchasing power of the pound are given in 'The Internal Purchasing Power of the Pound', a leaflet obtainable from the Information Services Division, Cabinet Office, Room 58/G, Government Offices, Great George Street, London, SW1P 3AQ.

Index of retail prices (Table 18.6)

The retail prices index measures the change from month to month in the average level of prices of goods and services purchased by most

households in the United Kingdom. The expenditure pattern on which the index is based is revised each year using information from the Family Expenditure Survey. The expenditure of certain higher income households and households of retired people dependent mainly on social security benefits is excluded.

The index covers a large and representative selection of more than 600 separate goods and services, for which price movements are regularly measured in more than 180 towns throughout the country. Approximately 130 000 separate price quotations are used in compiling the index.

The index of retail prices replaced the interim index from January 1956 (indices of the interim index of retail prices for the period 1952 to January 1956 were last published in *Annual Abstract of Statistics* No. 103, 1965). A new set of weights was introduced, based on ascertained expenditure in 1953–54, valued at January 1956 prices. Between January 1962 and 1974 the weights have been revised each January on the basis of ascertained expenditure in the three years ended in the previous June, valued at prices obtaining at the date of revision. From 1975 the weights have been revised on expenditure for the latest available year.

Tax and price index (TPI) (Table 18.7)

The purpose and methodology of the TPI were described in an article in the August 1979 issue (No. 310) of *Economic Trends* (HMSO). The TPI measures the increase in *gross* taxable income needed to compensate taxpayers for any increase in retail prices. The RPI measures changes in retail prices; the TPI also takes account of the changes to direct taxes (and employees' National Insurance contributions) facing a representative cross-section of taxpayers. It is thus an additional, more comprehensive, index.

Between Budgets the monthly increase in the TPI is normally slightly larger than that in the RPI, since all the extra income needed to offset any rise in retail prices is fully taxed. When direct taxation or employees' National Insurance contributions change the TPI will rise by less than or more than the RPI according to the type of changes made. However, the focus of attention should be the changes over twelve months.

Index numbers of agricultural prices (Tables 18.8 and 18.9)

The indices of agricultural prices for the United Kingdom are based on the calendar year 1980 are designed to provide an indication of movements in the purchase prices of the means of agricultural production and of the prices received by producers for their agricultural products. The methodology is compatible with that used for the other member states of the European Community and enables the compilation of indices for the Twelve, which appear in the Communities Eurostat series of publications.

Annual averages

1980 = 100

	1980 SIC ¹	1981	1982	1983	1984	1985	1986
Drawing and manufacture of steel wire and steel wire products	2234						
Single drawn wire of high carbon steel, whether covered or not (excluding insulated electric wire)		96.3	105.6	107.6	116.6	126.2	133.9
Single drawn wire of other than high carbon and alloy steel, whether covered or not (excluding insulated electric wire)		99.6	111.7	106.6	115.7	126.2	129.4
Woven wire cloth, gauze, fabric, etc. of iron and steel (excluding netting, fencing, similar iron and steel manufactures and fabric reinforcements for concrete) in squares or rectangular mesh		101.0	115.8	121.1	132.1	151.3	161.0
Stainless steel		101.3	113.0	116.2	126.8	147.5	159.2
Other than stainless steel		100.6	119.1	126.8	138.7	155.6	163.1
Grille, netting, fencing and similar iron and steel wire manufactures		106.6	113.6	116.0	122.2	131.2	132.2
Other drawing, cold rolling and cold forming of steel	2235	101.7	116.0	116.3	115.8	123.2	125.4
Aluminium and aluminium alloys	2245						
Primary aluminium and aluminium alloys unwrought (e.g. ingots, slabs, etc.)		100.5	100.5	117.2	136.5	136.5	136.5
Plate, sheet, strip circles and blanks		92.5	95.0	100.5	126.4	126.9	119.0
Extrusions and tubes (bars, rods, sections, etc.)		98.2	98.9	106.0	120.4	122.0	121.2
Copper, brass and other copper alloys	2246						
Copper (including cadmium copper)		98.1	101.9	115.3	116.6	122.0	111.8
Copper rods		97.5	99.9	112.8	111.3	112.6	97.8
Copper tubes		99.1	106.1	119.7	124.5	136.7	136.3
Copper sheet and copper strip		98.3	102.2	116.7	120.6	128.8	118.7
Woven wire cloth, gauze, fabric screening, sieving lawn or meshing (excluding paper machine (fourdrinier) wire)		99.9	109.7	115.7	124.3	132.5	137.6
Other non-ferrous metals and their alloys	2247						
Semi-manufactures of lead and lead alloys (e.g. sheet, pipe, shot, etc.)		97.3	89.4	85.6	95.8	92.2	85.6
Unwrought titanium and semi-manufactures		108.2	113.2	108.5	110.1	125.2	112.9
Extraction of minerals not elsewhere specified	23						
Extraction of stone, clay, sand and gravel	2310						
Extraction and dredging of uncoated sand and gravel (excluding sand for foundry purposes, glassmaking or other industrial uses)		114.2	126.6	139.2	149.3	158.2	166.8
Extraction of ball and china clays		107.5	120.8	120.8	132.0	139.9	145.4
Sand and gravel (delivered)		111.4	123.4	134.3	143.5	151.2	160.0
Salt extraction and refining	2330						
White salt		116.4	133.0	143.2	150.6	157.7	167.6
		116.9	135.0	146.0	153.8	161.5	170.5
Non-metallic mineral products	24						
Structural clay products	2410						
Common, facing and engineering bricks		113.4	125.3	134.8	148.7	161.1	170.2
Common bricks		113.5	125.7	135.5	150.5	163.8	172.2
Non-fletton (ex-works)		114.3	126.6	135.4	149.8	162.4	169.4
Fletton (delivered)		113.0	122.9	129.2	138.4	145.7	150.7
Facing bricks		116.3	132.8	145.7	168.7	189.8	200.2
Non-fletton (ex-works)		113.6	125.9	136.0	151.0	165.0	173.9
Fletton (delivered)		111.8	124.5	134.8	148.3	161.5	175.3
Clay roofing tiles (plain and single lap)		116.2	127.9	137.7	154.8	170.0	172.0
		120.1	134.8	149.7	163.2	176.8	194.3
Cement, lime and plaster	2420						
Calcareous cement (other than clinker) delivered – 25 miles		113.5	124.1	124.1	124.1	127.4	129.7
Calcareous cement (delivered in bulk – 25 miles)		113.5	124.1	124.1	124.1	127.3	129.6
Calcareous cement (delivered in bags – 25 miles)		113.5	124.1	124.1	124.1	127.4	129.7
Ready-mixed concrete	2436						
Other building products of concrete, cement or plaster	2437						
Plasterboard		110.9	121.3	129.1	136.4	141.9	143.0
Precast concrete goods		108.8	119.1	123.7	129.0	137.1	143.9
Flagstones		112.2	123.3	126.3	130.6	137.5	137.5
Kerbs and edgings		107.2	116.9	121.5	126.9	134.2	141.2
Concrete pipes to BS 556		109.0	118.5	125.2	130.8	136.3	144.3
Asbestos goods	2440						
Working of stone and other non-metallic minerals not elsewhere specified	2450						
Limestone and dolomite		108.9	116.5	123.3	129.1	133.0	139.5
Uncoated limestone roadstone and aggregates		98.6	100.1	94.9	95.0	96.6	96.3
Coated limestone roadstone		109.0	120.6	129.2	134.6	142.1	149.4
Granite		113.3	126.6	138.7	151.4	166.4	167.2
Granite and other chippings, aggregates and roadstone		110.7	125.1	137.6	150.3	165.8	170.6
Coated granite, whinstone and roadstone		106.7	120.1	133.2	145.9	156.5	166.6
Insulating materials for thermal or acoustic purposes		116.5	128.9	139.2	152.8	169.2	159.8
Mineral wool (rock and slag)		114.3	127.0	140.4	154.6	165.7	167.1
Abrasive products	2460						
Abrasive wheels, disc wheels, segments, sharpening stones, and other shapes or forms of bonded abrasives, including diamond		110.6	123.8	138.0	151.0	155.0	157.8
Coated abrasives – abrasive paper and cloth		117.1	129.5	142.2	157.4	173.9	174.3
Flat glass (further worked)		114.6	125.5	136.7	145.7	157.6	175.6
Glass containers	2478						
Glass products (other than flat glass or glass containers)	2479						
Domestic and ornamental glassware		112.4	123.8	132.8	141.2	150.6	180.9
		110.1	121.6	134.7	145.2	155.5	165.5
		111.1	122.8	134.9	146.0	156.5	166.4
		108.4	119.6	134.2	143.5	153.7	163.8
		91.2	86.8	90.9	91.5	91.5	96.6
		107.7	112.8	112.3	117.3	122.0	121.0
		106.4	113.8	117.6	111.2	113.7	116.2
		107.7	120.9	123.7	126.6	133.1	140.7

Annual averages

1980 = 100

	1980 SIC ¹	1981	1982	1983	1984	1985	1986
Refractory goods	2481	109.4	116.1	119.2	121.6	127.7	136.2
Refractory bricks and shapes		112.2	118.9	123.1	126.2	132.9	139.2
Firebricks and shapes		118.0	126.7	131.8	135.4	142.7	158.7
Ceramic goods	2489	110.5	119.8	129.0	135.5	142.2	150.6
Vitreous china sanitary ware		111.7	123.9	131.7	133.5	133.4	140.7
Wash basins, all types		112.1	124.4	128.8	128.8	128.6	136.4
WC pans, all types		111.9	124.4	135.9	137.5	137.3	143.4
Domestic china and pottery		109.8	117.2	127.7	135.2	..	..
China and porcelain		115.2	126.5	137.3	146.0	156.0	164.2
Table and kitchenware		..	126.5	137.3	145.7	155.6	163.7
Stoneware		112.4	122.1	135.6	147.7	155.6	..
Electrical ware wholly or mainly of ceramic material		111.1	121.9	130.6	138.5	148.3	158.2
Chemical industry	25						
Inorganic chemicals except industrial gases	2511	109.0	118.7	125.4	131.8	141.7	144.3
Chemical elements excluding elemental gases		110.4	112.6	112.6	122.9	139.6	132.0
Inorganic acids and oxygen compounds of non-metals		109.1	122.5	130.2	137.6	154.3	156.3
Sulphuric acid and oleum		116.7	130.6	138.2	149.1	186.2	180.2
Metallic oxides and inorganic bases		111.7	120.8	124.6	126.7	130.4	132.9
Metallic salts and peroxy salts of inorganic acids		105.9	116.1	124.2	129.8	139.3	145.7
Soda ash		105.6	117.4	122.6	127.4	133.7	141.0
Metallic salts and peroxy salts of inorganic acids other than soda ash		106.0	115.7	124.7	130.6	141.2	147.2
Basic organic chemicals except specialised pharmaceutical chemicals	2512	102.6	109.4	113.6	117.8	123.0	108.0
Halogenated sulphonated, nitrated or nitrosated derivatives of hydrocarbons		92.9	92.9	100.6	110.2	109.8	111.3
Alcohols, phenols and phenol-alcohols		100.1	106.2	109.4	113.9	119.4	105.8
Carboxylic acids and specified derivatives		99.9	103.5	103.8	110.7	116.1	109.8
Fertilisers	2513	110.5	115.3	116.1	119.7	127.7	114.3
Synthetic resins and plastics materials	2514	97.0	100.8	107.4	116.0	115.2	113.6
Products of polymerisation and copolymerisation		95.3	97.5	106.6	117.3	114.5	109.6
Acrylic lattices, dispersions and solutions, moulding and extrusion compounds, cast sheet, styrene polymers and copolymers		94.5	90.0	95.8	107.2	110.3	103.5
Dyestuffs and pigments	2516	100.9	107.7	108.1	114.2	124.5	131.0
Paints, varnishes and painters' fillings	2551						
Building, structural, preservative and decorative products—non-aqueous, oil and/or synthetic based		..	110.2	114.0	118.9	125.5	132.7
Building, structural, preservative and decorative products—filling and sealing compounds of all types		110.2	115.4	122.8	129.0	138.4	146.4
Chemical treatment of oil and fats	2563						
Vinyl resin emulsions		107.4	118.4	131.7	148.8	164.3	175.9
Fatty acids (excluding acid oils)		102.0	110.3	121.5	176.9	156.5	113.2
Formulated pesticides	2568	107.3	111.5	112.3	115.7	120.8	124.4
Pesticides		110.5	117.3	117.9	120.2	123.6	129.8
Insecticides (other than seed dressings) containing organo-phosphorous compounds		101.8	109.7	115.9	119.8	126.2	137.0
Preparations for plant control		105.8	108.7	109.6	113.5	119.4	121.8
Herbicides containing phenoxy derivatives of acetic, propionic or butyric acids		106.1	104.3	98.4	99.8	105.3	106.9
Adhesive film, cloth and foil	2569						
Adhesive film, tape, etc. of plastics or cellulose, adhesive cloth and foil		109.6	115.6	123.6	133.5	140.2	136.2
Pharmaceutical products	2570	111.7	120.5	126.3	130.5	137.2	141.8
Antipyretics (analgesics)		117.9	134.0	143.3	150.9	155.8	162.1
Plain hypotensives (cardiovascular system)		101.2	109.4	117.4	121.2	127.2	127.2
Plain diuretics		107.0	108.9	118.2	130.1	137.2	137.2
Cough and cold preparations		121.8	134.5	142.3	146.7	167.7	181.7
Preparations for the alimentary tract and nutrition		111.3	122.8	129.5	131.4	136.1	139.9
Antacids and anti-ulcerants		104.8	117.7	123.6	124.3	125.6	127.0
Vitamins and mineral supplements		112.6	121.2	126.2	128.4	130.3	132.6
Muscular and skeletal systems (systemic)		105.1	109.4	111.3	111.0	117.5	117.4
Dermatologicals		110.4	117.4	118.8	124.3	131.4	133.8
Antibiotics		109.9	114.0	115.2	107.2	105.9	106.2
Disinfectants		112.0	122.1	127.8	131.2	146.2	150.9
Surgical and medicated dressings		110.9	119.8	129.8	140.4	152.0	162.2
Soap and synthetic detergents	2581	104.0	111.1	118.4	126.1	134.4	137.6
Soap (excluding scouring preps.)		104.3	110.7	116.9	128.4	136.4	137.7
Toilet, in tablet form, (78/80 per cent fatty acid) in packs		102.5	106.7	111.8	126.9	134.4	134.9
Finished synthetic detergents (excluding scouring preps.)—liquid		97.8	101.7	106.1	115.6	123.1	127.6
Perfumes, cosmetics and toilet preparations	2582						
Men's aftershave, cologne and pre-shave lotions in alcoholic lotion form		113.3	122.6	128.2	135.0	148.4	159.1
Perfumes, cosmetics and toilet preparations, other than specifically for men		110.6	118.3	124.4	129.7	132.0	139.3
Talc and dusting powders and bath preparations		110.5	124.1	131.2	138.6	142.1	150.5
Talc and dusting powders		108.3	113.7	121.4	127.4	139.5	148.0
Lipsticks and lipglosses, including lipsalve		106.2	112.8	115.3	126.8	122.4	128.5
Face powders		112.7	128.4	139.2	149.9	160.5	171.8
Liquid and cream		109.0	118.9	124.5	134.8	134.0	143.5
Deodorants, anti-perspirants and depilatories		113.9	119.6	120.0	117.6	119.8	124.3
Toothpaste and dental powders		105.8	107.4	111.9	114.1	117.0	120.9
Soapless shampoos		112.7	119.1	121.5	121.1	119.4	121.6
Photographic materials and chemicals	2591	102.5	110.1	116.1	124.5	134.9	139.7

Metal furniture							
Office furniture, wholly or mainly of metal							
Office seating, wholly or mainly of metal							
Adjustable							
Other than adjustable							
Filing cabinets							
Domestic and similar utensils of metal	3167						
Kettles (non-electric) and teapots of aluminium							
Bakeware, including baking pans, tins, sheets, etc.							
Pressure cookers, percolators and other domestic holloware							
Finished metal products nes	3169						
Locks, padlocks, latches, keys and blanks including bicycle locks (excluding for motor vehicles and time locks)							
Base metal fittings and mountings for furniture, builders' joinery, leather and travel goods nes							
Doors and door frames							
Sanitary ware and plumbing fixtures and fittings							
Domestic cocks and taps							
Aluminium ladders and steps							
Fire extinguishers (hand operated chemical type)							
Mechanical engineering	32						
Agricultural machinery	3211						
Harvesting and threshing machinery							
Pick-up balers							
Bale handling machinery tractor/trailer mounted							
Grain and grass dryers							
Dairy, feed processing and other agricultural machines							
Milking machinery							
Agricultural elevators and conveyors (including grain augers)

United Kingdom

Annual averages

1980 = 100

	1980 SIC ¹	1981	1982	1983	1984	1985	1986
Wheeled tractors	3212						
Wheeled tractors, complete (including KD tractors of a minimum value of 50 per cent of a corresponding complete tractor)		108.5	114.8	124.8	134.1	143.8	150.2
Metal working machine tools	3221	107.4	115.9	123.1	133.2	144.9	153.7
Metal cutting machine tools		106.4	114.8	119.9	126.6	139.2	148.3
Numerically controlled machine tools complete		96.5	101.0	103.5	109.1	113.4	117.7
Numerically controlled turning machines		109.3	118.8	123.7	132.6	141.0	147.8
Non numerically controlled metal cutting machine tools—complete		107.3	116.2	122.3	128.3	139.9	150.9
Non numerically controlled drilling machines		110.3	121.8	130.3	138.4	147.8	156.8
Non numerically controlled grinding machines		107.8	112.0	115.8	121.4	134.3	141.7
Non numerically controlled milling machines		103.9	111.1	118.2	124.1	143.9	..
Non numerically controlled turning machines		111.0	121.3	125.8	131.8	140.8	149.4
Non numerically controlled metal forming machine tools		111.2	120.0	136.6	160.4	168.4	176.1
Presses: mechanical		108.4	104.5	101.2	106.5	111.2	117.2
Engineers' small tools	3222						
Hard tipped and other metal cutting tools		108.7	117.0	125.2	131.9	140.8	147.7
Hard metal tips and die pellets sold separately		107.3	113.9	118.0	123.0	127.7	131.6
Diamond tipped tools and dies		109.9	116.2	122.0	130.9	145.1	150.9
Saws and saw blades		106.4	115.0	118.8	124.1	127.3	131.9
Bandsaws and blades for metal		108.6	117.2	120.8	129.7	137.7	141.4
Reamers, end mills and similar shank tools		111.1	122.9	133.6	144.5	160.7	167.0
Milling cutters		108.7	119.5	127.8	135.8	141.4	143.4
Lathe and planer tools		107.3	114.5	122.7	129.6	142.9	152.2
Textile machinery	3230	106.9	111.3	113.3	118.9	122.0	125.5
Food, drink and tobacco processing machinery; packaging and bottling machinery	3244						
Food and drink processing machinery		111.0	125.7	136.2	142.2	152.2	161.7
Bakery and confectionery machinery (including parts)		108.6	119.0	125.4	133.8	142.1	149.2
Drink processing machinery including parts		104.7	111.8	117.1	123.0	125.6	127.8
Grain milling machinery and plant (including parts)		111.4	128.5	136.5	147.4	162.9	169.7
Machines for filling, closing, sealing, capsuling or labelling containers		113.6	122.4	123.6	130.2	138.3	143.3
Filling, etc. machines for cans		113.2	129.4	136.0	144.0	147.4	153.2
Packing and wrapping machines		111.1	126.9	130.6	134.9	138.1	150.7
Mining machinery	3251	111.8	125.8	138.4	146.0	162.7	169.9
Mineral transport machinery		109.8	116.8	133.2	139.9	148.3	152.7
Construction and earth moving equipment	3254	110.2	119.4	124.7	126.3	137.7	139.2
Wheeled tractor shovels		108.9	116.4	119.7	124.0	131.8	136.1
Dumpers and dump trucks		108.5	119.6	124.8	128.4	135.1	..
Equipment for concrete, crushing and screening and road works		108.1	117.7	123.5	125.7	138.0	143.8
Concrete mixing and placing machinery and parts		109.6	116.8	120.2	124.7	133.2	138.6
Road rollers and parts		107.8	117.8	121.4	123.6	129.0	135.2
Roadmaking and maintenance plant		103.6	113.9	123.1	126.1	134.3	..
Crushing, pulverising and screening plants including parts		..	117.8	124.3	129.6	139.4	143.4
Mechanical lifting and handling equipment	3255	109.3	114.9	114.7	119.7	128.7	135.1
Cranes and transporters		108.2	115.9	120.9	125.2	129.7	135.4
Lifting and winding devices		106.5	115.5	121.3	126.4	130.4	139.8
Lifting jacks, vehicle jacks and lifts		110.4	119.8	121.9	121.5	126.9	136.2
Capstans, winches, windlasses		108.3	116.1	120.1	112.6	116.7	126.3
Powered industrial trucks		112.2	128.7	124.4	124.4	130.2	138.8
Fork lift trucks		108.6	115.0	121.9	127.6	134.3	139.1
Precision chains and other mechanical power transmission equipment	3261	108.5	114.6	121.4	127.2	134.3	139.2
Transmission chains		107.0	108.0	113.5	118.9	129.3	136.0
Bearings and bushes other than ball roller and needle roller bearings and parts and plain bearings		105.2	115.9	120.1	124.2	129.6	134.9
Ball, needle and roller bearings	3262	107.5	105.6	111.5	117.3	130.9	136.7
Machinery for working wood, rubber, plastics, leather and making paper, glass, bricks and similar materials; laundry and dry cleaning machinery	3275	110.2	118.2	123.7	127.9	132.8	138.2
Woodworking machinery							
Sawing		110.6	118.0	124.0	134.6	144.6	150.6
Boot and shoe-making and repairing machinery		108.1	117.9	121.6	132.3	144.1	149.9
Laundry and dry cleaning machinery		107.2	109.7	115.6	118.0	122.8	128.7
Internal combustion engines (except for road vehicles, wheeled agricultural tractors and aircraft) and other prime movers	3281	106.1	112.2	121.4	130.3	136.8	135.6
Compression ignition IC engines, industrial							
IC marine engines, propelling, up to 50 kW		111.4	119.8	125.5	128.8	134.1	139.4
Compressors and fluid power equipment	3283	110.8	120.4	126.1	134.2	142.0	..
Compressors		109.2	119.4	127.8	134.9	142.8	151.0
Oil hydraulic pumps		110.1	115.6	122.1	126.5	132.6	140.4
Oil hydraulic control valves		106.9	115.6	125.0	132.7	141.3	148.2
Pneumatic control equipment		110.1	116.6	124.3	133.9	142.6	151.6
Directional control, flow control, check and non-return valves, and moving and non-moving fluidic devices		113.4	125.2	134.3	143.2	152.8	160.8
Other pneumatic control equipment (including pressure control valves)		114.0	125.4	133.9	143.3	156.7	167.2
Refrigerating machinery, space heating, ventilating and air conditioning equipment	3284	113.0	125.2	134.5	143.0	150.4	157.0
Boilers for central heating							
Heat emitters		109.6	117.3	125.0	133.2	138.9	144.6
Ventilating fans		111.5	130.9	146.8	146.7	151.5	155.2
		109.6	124.9	133.1	138.2	146.9	152.6

p per kg													

1. This table gives indications of the movement in commodity prices at the first point of sale. The series do not always show total receipts by farmers; for some commodities additional premiums or deficiency payments are made to achieve support price levels.

2. Weighted average ex-farm prices of United Kingdom cereals.

3. Average farm-gate prices paid by English Hops Ltd to growers in England. Hops are not grown elsewhere in the United Kingdom.

4. Weighted average price paid to growers by registered merchants for early and main crop potatoes in the United Kingdom. The 1986 figure is provisional.

5. Average price paid to growers in the United Kingdom by British Sugar plc for sugar beet of average sugar content. The 1986 figure is provisional.

6. Typical contract price adjusted to delivered basis and 42 per cent oil content.

7. Weighted average wholesale prices for England and Wales. From 1982, for England only.

8. Average prices at representative markets in England and Wales.

9. Based on Meat and Livestock Commission all clean cattle prices.

10. UK weighted average market price for animals certified under the Fat Sheep Guarantee Scheme/Sheep Variable Premium Scheme.

11. Derived by dividing total value of output by the total quantity of output available for human consumption.

12. Average price of all Class A eggs weighted according to quantity in each grade.

13. Great Britain weighted average market price for animals certified under the Sheep Variable Premium Scheme from 1982.

14. Northern Ireland unweighted average market price for clean sheep from 1982.

15. Figures forecasted.

Source Ministry of Agriculture, Fisheries and Food

Index of sources

This index of sources gives the titles of official publications or other sources containing statistics allied to those in the tables of this *Annual Abstract*. These publications provide more detailed analyses than are shown in the *Abstract*. This index includes

publications to which reference should be made for short-term (monthly or quarterly) series. No entry is made in this index for items where the data have been obtained from departmental records.

National Accounts

Pink Book

How much does the 'City' contribute to the United Kingdom's overseas earnings? What are our total transactions with the rest of the European Community? What are the United Kingdom's overseas assets and liabilities? The answers are all in the CSO Pink Book, *United Kingdom Balance of Payments*.

The Pink Book is the basic reference book for balance of payments statistics. It provides detailed information on visible trade, invisibles and capital transactions as well as sections on specific aspects of the balance of payments.

Blue Book

United Kingdom National Accounts, the CSO Blue Book, is the essential data source for everyone concerned with macro-economic policies and studies.

The principal annual publication for national accounts statistics provides detailed estimates of national product, income and expenditure for the United Kingdom.

The Blue Book covers value added by industry, personal sector, companies, public corporations, central and local government, capital formation and financial accounts. Tables contain up to 22 years' data. There are notes and definitions.

CENTRAL STATISTICAL OFFICE PUBLICATIONS

ANNUAL

Annual Abstract of Statistics — has some 350 tables generally giving data for the last eleven years covering just about every aspect of economic, social and industrial life.

Social Trends — provides a valuable insight into the changing patterns of life in Britain. The chapters provide analyses and breakdowns of statistical information on population, households and families, education and employment, income and wealth, resources and expenditure, health and social services, and many other aspects of British life and work.

Regional Trends — with over 130 tables and 50 maps and charts, brings together a wide range of government statistics on the various countries and regions of the United Kingdom.

United Kingdom National Accounts — The CSO Blue Book is the essential data source for everyone concerned with macro-economic policies and studies and shows how the nation makes and spends its money. It is issued in early September and covers all aspects of the United Kingdom economy giving data for the last eleven years or longer.

United Kingdom Balance of Payments — The CSO Pink Book is the basic reference book for balance of payments statistics, presenting all the statistical information, for the last eleven years or more, needed by analysts who seek to assess UK transactions with the rest of the world.

Key Data — with over 130 tables, maps and coloured charts covers a very wide range of social and economic data. Each table and chart is accompanied by a reference to sources.

MONTHLY

Economic Trends — a compilation of all the main economic indicators liberally illustrated with charts and diagrams. The largest section gives time series and graphs over the last five years or so. It is the primary publication for quarterly articles on national accounts and the balance of payments as well as others commenting on and analysing economic statistics. The *Economic Trends Annual Supplement* contains long runs of annual and quarterly figures for the key series of economic indicators.

Financial Statistics — gives data on the key financial and monetary statistics of the United Kingdom. Tables usually contain at least 18 monthly and 12 quarterly or 5 annual figures. The annual *Financial Statistics Explanatory Handbook* contains comprehensive notes and definitions for the tables.

Monthly Digest of Statistics — provides basic information on 20 subjects. Tables contain mostly runs of monthly and quarterly estimates for at least two years and annual figures for several more. The annual *Monthly Digest of Statistics Supplement of Definitions and Explanatory Notes* gives definitions for items and units in the *Digest*. It also applies to corresponding items in the *Annual Abstract* and *Regional Trends*.

OTHERS

Guide to Official Statistics (fifth edition) — an indispensable reference book for all users of statistics. Vital information about sources of government and important non-government statistics for the United Kingdom over the last five years are given.

United Kingdom National Accounts: Sources and Methods (third edition) — an essential reference book for everyone who makes use of national accounts data. It contains details of the concepts, definitions, statistical sources, methods of compilation and reliability of the various statistical sources which comprise the national accounts.

Statistical News — a quarterly journal providing a comprehensive account of current developments in British official statistics.

Standard Industrial Classification Revised 1980 — is a system of classification of establishments according to industry covering all economic activity.

Indexes to the Standard Industrial Classification Revised 1980 contains lists of characteristic activities for each heading of the classification as well as an alphabetical index of activities. The publication is also indexed to the previous 1968 classification and to the European standard industrial classification (NACE).

CSO publications are published by HMSO and available from the addresses given on the back cover.

Units of measurement

Length

1 millimetre (mm)		= 0.039 370 1 inch
1 centimetre (cm)	= 10 millimetres	= 0.393 701 inch
1 metre (m)	= 1 000 millimetres	= 1.093 61 yards
1 kilometre (km)	= 1 000 metres	= 0.621 371 mile
1 inch (in.)		= 25.4 millimetres or 2.54 centimetres
1 foot (ft.)	= 12 inches	= 0.304 8 metre
1 yard (yd.)	= 3 feet	= 0.914 4 metre
1 mile	= 1 760 yards	= 1.609 34 kilometres

Area

1 square millimetre (mm ²)		= 0.001 55 square inch
1 square metre (m ²)	= one million square millimetres	= 1.195 99 square yards
1 hectare (ha)	= 10 000 square metres	= 2.471 05 acres
1 square kilometre (km ²)	= one million square metres	= 247.105 acres
1 square inch (sq. in.)		= 645.16 square millimetres or 6.451 6 square centimetres
1 square foot (sq. ft.)	= 144 square inches	= 0.092 903 square metre or 929.03 square centimetres
1 square yard (sq. yd.)	= 9 square feet	= 0.836 127 square metre
1 acre	= 4 840 square yards	= 4 046.86 square metres or 0.404 686 hectare
1 square mile (sq. mile)	= 640 acres	= 2.589 99 square kilometres or 258.999 hectares

Volume

1 cubic centimetre (cm ³)		= 0.061 023 7 cubic inch
1 cubic decimetre (dm ³)	= 1 000 cubic centimetres	= 0.035 314 7 cubic foot
1 cubic metre (m ³)	= one million cubic centimetres	= 1.307 95 cubic yards
1 cubic foot (cu. ft.)		= 0.028 316 8 cubic metre or 28.316 8 cubic decimetres
1 cubic yard (cu. yd.)	= 27 cubic feet	= 0.764 555 cubic metre

Capacity

1 litre (l)	= 1 cubic decimetre	= 0.220 gallon
1 hectolitre (hl)	= 100 litres	= 22.0 gallons
1 pint		= 0.568 litre
2 pints	= 1 quart	= 1.137 litres
8 pints	= 1 gallon	= 4.546 09 cubic decimetres or 4.546 litres
36 gallons (gal.)	= 1 bulk barrel	= 1.636 56 hectolitres

Weight

1 gram (g)		= 0.035 274 0 ounce
1 hectogram (hg)	= 100 grams	= 3.527 4 ounces or 0.220 462 pound
1 kilogram (kg)	= 1 000 grams or 10 hectograms	= 2.204 62 pounds
1 tonne (t)	= 1 000 kilograms	= 1.102 31 short tons or 0.984 2 long ton
1 ounce avoirdupois (oz.)		= 28.349 5 grams
1 pound avoirdupois (lb.)	= 16 ounces	= 0.453 592 37 kilogram
1 hundredweight (cwt.)	= 112 pounds	= 50.802 3 kilograms
1 short ton	= 2 000 pounds	= 907.184 74 kilograms or 0.907 184 74 tonne
1 long ton (referred to as ton)	= 2 240 pounds	= 1 016.05 kilograms or 1.016 05 tonnes
1 ounce troy	= 480 grains	= 31.103 5 grams

Energy

British thermal unit (Btu)	= 0.252 kilocalorie (kcal) = 1.05 506 kilojoule (kJ)
Therm	= 100 000 British thermal units = 25 200 kcal = 105 506 kJ
Megawatt (Mw)	= 10 ⁶ watts
Gigawatt hour (GWh)	= 10 ⁶ kilowatt hours = 34 121 therms

Food and drink

Butter	23 310 litres milk	= 1 tonne butter (average)
Cheese	10 070 litres milk	= 1 tonne cheese
Condensed milk	2 550 litres milk	= 1 tonne full cream condensed milk
	2 953 litres skimmed milk	= 1 tonne skimmed condensed milk
Milk	1 million litres	= 1 030 tonnes
Milk powder	8 054 litres milk	= 1 tonne full cream milk powder
	10 740 litres skimmed milk	= 1 tonne skimmed milk powder
Eggs	17 126 eggs	= 1 tonne (approximate)
Sugar	100 tonnes raw sugar	= 95 tonnes refined sugar
Beer	1 bulk barrel	= 36 gallons irrespective of gravity

Shipping

Gross tonnage	= The total volume of all the enclosed spaces of a vessel, the unit of measurement being a ton of 100 cubic feet.
Deadweight tonnage	= Deadweight tonnage is the total weight in tons of 2 240 lb. that a ship can legally carry, that is the total weight of cargo, bunkers, stores and crew.

Annual Abstract of Statistics

For about 140 years the *Annual Abstract of Statistics* has probably been the most quoted source of statistics about the United Kingdom.

348 tables in 18 separate chapters cover just about every aspect of economic, social and industrial life.

Area and climate	Education	Transport
Population	Employment	Communications
Vital Statistics	Defence	Retailing
Social Services	Energy	External Trade
National Insurance and Health	Iron and Steel	National Income and Expenditure
Public Health	Building	Home Finance
Housing	Manufacturing	Banking
Elections	Agriculture and Food	Insurance
Law Enforcement	Fisheries	Prices

Most of the data in the *Abstract* are annual and cover periods of about 10 years.

The *Abstract* complements the *Monthly Digest of Statistics* which contains monthly or quarterly data on similar subjects.

Regional Trends provides similar data by region.
